

Making a Mixture!

Aim: To investigate a mixture

Equipment:

- 1 teaspoon of citric acid
- 1 teaspoon of bicarbonate Skoda
- 1 teaspoon of icing sugar
- 1 teaspoon
- 1 ziplock bag

Procedure

1. Mix the 3 chemicals in the bag
2. Take a photo
3. Put a small amount on your tongue
4. Describe what happens

Results

1. Take a photo of your mixture

2. Describe what happens when you put a little bit on your tongue

Discussion

1. Why is the bicarbonate soda, citric acid and icing sugar called a **mixture** when it is in the bag?
2. What happens to the mixture when it contacts your tongue?
3. Is it still a mixture when it contacts your tongue? Why/why not?
