

# Year 7 Biological Science

2019 Autumn Term

## SCIENCE UNDERSTANDING

There are differences within and between groups of organisms; classification helps organise this diversity (ACSSU111)

Interactions between organisms can be described in terms of food chains and food webs; human activity can affect these interactions (ACSSU112)

### Elaborations

- considering the reasons for classifying such as identification and communication
- grouping a variety of organisms on the basis of similarities and differences in particular features
- considering how biological classifications have changed over time
- classifying using hierarchical systems such as kingdom, phylum, class, order, family, genus, species
- using scientific conventions for naming species
- using provided keys to identify organisms surveyed in a local habitat
- 
- using food chains to show feeding relationships in a habitat
- constructing and interpreting food webs to show relationships between organisms in an environment
- classifying organisms of an environment according to their position in a food chain
- recognising the role of microorganisms within food chains and food webs
- investigating the effect of human activity on local habitats, such as deforestation, agriculture or the introduction of new species
- exploring how living things can cause changes to their environment and impact other living things, such as the effect of cane toads
- researching specific examples of human activity, such as the use of fire by traditional Aboriginal people and the effects of palm oil harvesting in Sumatra and Borneo

WEEK	ASSESSMENT	WEIGHTING
1	Education Perfect Summary: Living & non-living	2%
3	Research Project: Animal Profile	10%
6	Learning Checkpoints: Quiz	3%
10	Topic Test	10%

### TEACHER INFORMATION

- ItunesU course code = FJJ-PPX-WRJ  
extension Activities: as described in ItunesU course
- STILE: Classification, Food chains & food webs units
- Education perfect links in iTunes U

Week	Content	Success Criteria Students will be able to:	Activity Suggestions	Assessments/Notes
<b>1</b> <b>4 lessons</b>	<b>Hook Lesson from STILE:</b> Why do zebras have stripes?  <b>Living things</b> <ul style="list-style-type: none"> <li>What is an organism?</li> <li>Is it living, non living or dead?</li> <li>-MRS GREN = Needs of living things</li> <li>Unicellular vs Multicellular</li> <li>Compare &amp; contrast activity</li> </ul> <b>Why do we classify?</b>  <b>What is Taxonomy?</b> <ul style="list-style-type: none"> <li>Changing Classification systems</li> <li>Carolus Linnaeus 'Father of Taxonomy</li> <li>Timeline of taxonomy</li> </ul>	<ul style="list-style-type: none"> <li>Examine a new theory as to why zebras have stripes</li> <li>Identify prior knowledge of living things</li> <li></li> <li>Create a poster displaying 5 living organisms in your local area ( HW activity over the weekend. Students can take photos)</li> <li>Ext Activity :Name/identify the organisms</li> <li>Give examples of living, non-living and dead</li> <li>State the 7 principles of Mrs GREN</li> <li>Compare &amp; contrast between Unicellular &amp; Multicellular</li> <li>Define classification &amp; taxonomy</li> <li>Explain why classification is important</li> <li>Explain who Carolus Linnaeus was and his impact on science</li> </ul>	STILE > Classification > Introduction lesson  Living, non-living or dead investigation iTunes U <b>or STILE lesson 1.1 living or non-living?</b> -Mrs Gren Kahoot  Classify items in the pencil case (itunesU activity) <b>or STILE lesson 1.2 Why do we classify?</b>	Formative assessment from STILE  Education Perfect Summary <i>Science&gt; science yr 7&gt;biological science&gt;classification&gt;2. Living or nonliving&gt; 2.1 living or non living</i>
<b>2</b> <b>2 lessons</b>	<b>Scientific Spells</b> <ul style="list-style-type: none"> <li>Words in science- common prefixes in science</li> <li>Taxonomic Rank: The order of the groupings kingdom, phylum, class, order, family, genus and species</li> <li>Mnemonic</li> </ul>	<ul style="list-style-type: none"> <li>use common prefixes in science</li> <li>list the categories in the taxonomic rank</li> <li>create a mnemonic to remember the order</li> <li>use their understanding of classification to analyze the similarities between different species</li> </ul>	STILE lesson 1.3 levels of classification	

Week	Content	Success Criteria :Students will be able to:	Activity Suggestions	Assessments/Notes
<b>3</b> <b>4 lessons</b>	<b>The Five Kingdoms</b> <ul style="list-style-type: none"> <li>Five-kingdom system of classification</li> <li>Classification systems still changing?</li> <li>Focus on animals in the phylum Chordata are divided into five classes on the next lower level of classification.</li> </ul> <b>Binomial Nomenclature</b> Rules for writing a scientific name  <b>Research Project: Animal Profile (2 lessons in class)</b>	<ul style="list-style-type: none"> <li>understand that organisms are classified into different kingdoms</li> <li>use their understanding of classification to analyze the similarities between different species</li> <li>determine the scientific names for a range of organisms</li> <li>examine Latin and Greek root words and how they are used in scientific names</li> <li>imagine they have discovered a new species and create a scientific name for it</li> <li>reflect on their learning by completing the Headlines Visible Thinking routine.</li> </ul> <ul style="list-style-type: none"> <li>Create a social media profile for an animal that describes how it is classified</li> </ul>	STILE lesson 1.3 levels of classification Q 13-18  STILE lesson 1.4 Scientific names  <u>Rules for writing scientific names</u> the species name is made up of the genus name as the first word and the descriptive or specific name as the second word. The genus name begins with a capital letter and lower case is used for the descriptive name. If handwritten, the species name should be underlined; if typed, it should be in italics. Apply the above language conventions to classification of living things	<b>Research Project: Animal Profile (see STILE 1.5 for lesson- need to change lesson to assessed)</b>
<b>4</b> <b>4 lessons</b>	<b>Dichotomous Keys</b> <ul style="list-style-type: none"> <li>It is better to use the presence or absence of structural features or differences in these features rather than size, colour, behaviour and habitat.</li> <li>They can be presented as branching keys or tabular keys.</li> </ul>	<ul style="list-style-type: none"> <li>watch a short video about dichotomous keys in table format</li> <li>state that a dichotomous key provides choice at each branch (dichotomous = 'cutting in two').</li> <li>use table and flow chart dichotomous keys to identify a range of characters and organisms</li> <li>make a simple dichotomous key to sort pieces of lab equipment</li> <li>create a dichotomous key for a particular group of objects</li> <li>reflect on their learning by completing the Connect, Extend, Challenge Visible Thinking routine</li> </ul>	STILE lesson 2.1 Using dichotomous keys  extra activities in iTunes U  STILE lesson 2.2 Create a dichotomous key
