

Review questions

Units 1 & 2 – Chapter 10

Research methods: Planning and conducting psychological research

The following chapter review consists of multiple choice, true/false, fill in the blanks, matching and labelling questions. Check your answers on the last page.

- 1 Research methods are ways of collecting _____.
- 2 Open-ended interviews are a good way to collect quantitative data.
☐ True
☐ False

- 3 Match each term with its correct definition.

a Self-report	i A common form of self-report measure that provides quantitative data
b Qualitative data	ii Data that are not expressed in numbers
c Open-ended interview	iii Data that are expressed in numbers and can be analysed statistically
d Fixed-response interview	iv Participants provide spoken or written answers in response to questions asked by the researcher
e Quantitative data	v The participant is only given a limited choice of answers in response to a question
f Rating scales	vi The researcher asks participants to comment freely on a particular issue

- 4 A focus group is a specific type of:
A open-ended interview.
B fixed-response interview.
C rating scale.
D quantitative method.
- 5 Values in psychology are not relevant to ethical professional practice.
☐ True
☐ False

6 Match the following terms with their definitions.

a Reliable	i Looks at whether the test items are in keeping with the constructs on which the test was based
b Valid	ii The most straightforward measure of validity
c Test–retest reliability	iii Looks at the extent to which a test can predict other attributes or behaviours thought to be related to the constructs tested
d Face validity	iv Looks at the correlation between scores obtained on a test and scores obtained on the same test taken at a later date
e Construct validity	v Describes a measure that is consistent with itself and across time
f Predictive validity	vi Describes a measure that measures what it is intended to measure

7 If a new personality test correlated 0.87 with a well-established test of personality it would be said to have good predictive validity.

- ☐ True
☐ False

8 Operationalising the hypothesis means:

- A** identifying the variables.
B stating it in general terms.
C stating it in terms of the measured variables.
D making an educated guess.

9 According to the *APS Code of Ethics*, participants must not be coerced into participating in research through bribery or offers of rewards. This is the right of _____ participation.

- A** informed
B voluntary
C confidential
D mandatory

10 Informed consent means that those taking part in a study know why it is being carried out and what they will be expected to do.

- ☐ True
☐ False

11 _____ is the right of people to have information disclosed in a professional relationship kept within that relationship.

- A** Anonymity
B Privacy
C Informed consent
D Confidentiality

- 12 The people who provide the data in psychological studies and experiments are known as _____.
- 13 In psychological research, the smaller subset of the population is known as a sample.
☐ True
☐ False
- 14 A way of collecting qualitative data in which a researcher asks group members about their ideas, perceptions, opinions in a more natural setting is known as a:
A fixed-response interview.
B open-ended interview.
C focus group.
D questionnaire.
- 15 The concern that focus group members' comments might be affected by the wish to provide socially acceptable answers is known as the _____.

Review questions answers

- 1 data
- 2 False
- 3 a iv; b ii; c vi; d v; e iii; f i
- 4 A
- 5 False
- 6 a v; b vi; c iv; d ii; e i; f iii;
- 7 False. It would be said to have good *concurrent* validity.
- 8 C
- 9 B
- 10 True
- 11 D
- 12 Participants
- 13 True
- 14 C
- 15 social desirability bias
