

Neurological Disorders Project

Neurological disorders are diseases of the central and peripheral nervous system. In other words, the brain, spinal cord, cranial nerves, peripheral nerves, nerve roots, autonomic nervous system, neuromuscular junction, and muscles. These disorders include epilepsy, Alzheimer disease, Parkinson's disease and many others.

Mental disorders, on the other hand, are "psychiatric illnesses" or diseases which appear primarily as abnormalities of thought, feeling or behaviour, producing either distress or impairment of function.

Hundreds of million of people worldwide are affected by neurological disorders: For example, 50 million people have epilepsy; 62 million are affected by cerebrovascular disease; 326 million people suffer from migraine; 24 million are affected by Alzheimer disease and other dementias globally.

TASK

On your own you will research a disorder or disease of the nervous system and present your findings to the class in the form of a PowerPoint Presentation. You will need to turn in a printout of your presentation on **Friday, December 13, 2013**. Presentations will begin on **Monday, December 16, 2013**.

Include the following information in this order:

- Description of the disorder - focus on Anatomy and Physiology of the brain and nervous system.
- Images relating to the disorder - these could be MRI's of the brain or even photos of people
- Symptoms, describe what life is like for a person with the disorder
- How does a person get the disorder - it might be genetic, the result of an injury, or possibly the factors are unknown.

You may choose any of the following disorders. If one is not on the list, check with your teacher to see if it is appropriate.

- Alzheimer's Disease
- Asperger's Syndrome
- Attention Deficit Disorder
- Autism
- Bipolar Disorder
- Dissociative Disorder
- Depression
- Cerebral palsy
- Dyslexia
- Epilepsy
- Fetal Alcohol Syndrome
- Huntington's Disease
- Migraines
- Multiple Sclerosis
- Narcolepsy
- Parkinson's Disease
- Huntington's Disease
- Rett Syndrome
- Panic Disorder
- Obsessive Compulsive
- Schizophrenia
- Spina Bifida
- Stroke
- Tourette Syndrome

Website Resources

Once you have chosen the disorder you want to study, use google to research it. The following sites may also be helpful

[Neuroscience for Kids](#)
[Health Insite \(Brain Diseases\)](#)
[Brainweb \(Dana Foundation\)](#)
[Washington U. Disorders](#)
[PageMentalHealth.com](#)

- Treatment options - can it be cured or can the symptoms be managed?
- Additional Information - add a few extra things related to the disorder, this could be slides of famous people who have the disorder, organizations about the disorder, trivia, medical history. You can also link to a short video from a news site.

* Be aware of your audience (the class) and avoid overly technical medical information - avoid copy-pasting from sites. You want your presentation to be understood by the average person.

SCORING					
	Excellent (4)	Good (3)	Fair (2)	Needs Work (1)	Not Evident
Information: Anatomy & Physiology Abundance of facts that relate to the disorder, includes specific information about the brain, or cells are biological processes					
Information: Symptoms, list and descriptions of the most common					
Information: Developing the Disorder. Is it genetic, environmental?					
Information: Treatment of the Disorder. What medications are used, how does a person live with the disorder?					
Additional Information: History, Famous people, Trivia, Possibly a video included					
Information: Audience (Target audience is addressed)					
Organization: Follows a logical order, transitions are smooth					
Creativity: Use of images, slide transitions, bulleted lists, etc					
	TOTAL (out of 30)				

How to Print a PowerPoint Handout:

1. Open your presentation in the Microsoft PowerPoint program and choose File on the menu bar
2. Choose Print
3. In the Print command box under "Print what:" select Handouts then next to "Slides per page:" select 6
4. Click on OK and your PowerPoint Handout will print.
