 Verbal/Linguistic  Visual/Spatial

1 Name the parts A to G on the diagram using labels from the box below.

stage	fine focus knob	coarse focus knob
mirror	objective lens	eyepiece
		handle

2 Match the part of the microscope with its description by joining them with a line. The first one has been done for you.

- | | |
|-------------------------|--|
| (a) Eyepiece | Part of the microscope on which the specimen is placed |
| (b) Coarse focus knob | Sharpens the focus on high power |
| (c) Stage | Unit used to measure microscopic objects |
| (d) Objective lens | Equipment used to make a wet mount |
| (e) Micrometre | The object being studied using the microscope |
| (f) Specimen | The lens of the microscope closest to the specimen |
| (g) Mirror | The part of the microscope you look through |
| (h) Fine focus knob | Used to reflect light through the specimen |
| (i) Slide and coverslip | Used to focus the microscope on low power |
