

1. Gorilla

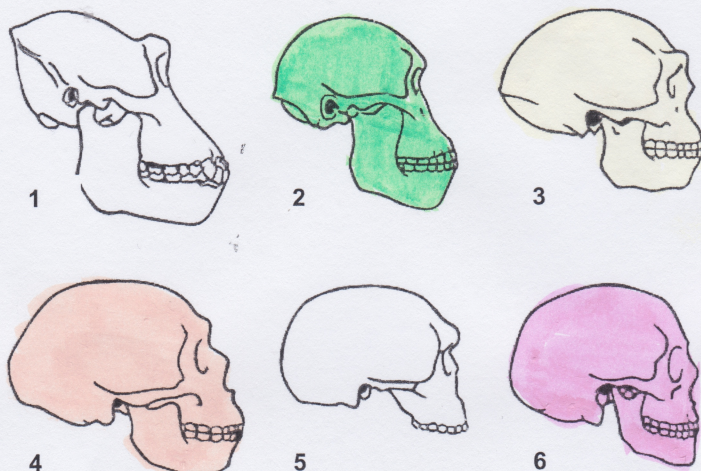

2. Australopithecine

3. Homo erectus

4. Homo neandertalensis

5. Homo heidelbergensis

6. Homo sapiens

Australopithecine: Brow ridges less prominent. Higher forehead and shorter face. Flat nose and no chin.

Homo Erectus: Flat thick skull with sagittal keel and low brow ridge.

Homo neandertalensis: Double-arched brow ridges, high rounded orbits, midface ~~recessed~~ projection; weak chin, low long skull and small mastoid process.

Homo sapiens: small or no brow ridge, shorter or higher skull.
