

Exploring Chemistry Year 11: Experiments, Investigations and Problems

Contents

How to use this book
Laboratory Safety
Laboratory Techniques
A guide to writing practical reports
Measurements in chemistry
Random and systematic errors

Section 1: Investigating in Chemistry

Exploring Chemistry Stage 2 Reference

Mixtures, kinetic theory and gases

Context 1	Chemistry in the blood	
Experiment 1	Mixtures	Exp 1
Experiment 2	Separation of mixtures by filtration and crystallization	(Exp 2 Red Book)
Experiment 3	Purification of salt water by distillation	(Exp 2 Red Book)
Experiment 4	Separation of food dyes using paper chromatography	(Exp 3 Red Book)
Investigation 5	Chromatography - a bonding competition	Inv 5
Experiment 6	Pure substance or mixture?	Exp 2
Experiment 7	Law makers – Henry and Boyle	Exp 6

Atomic structure and bonding

Context 2	Atoms and spectroscopy	
Experiment 8	Fireworks and flame tests	Exp 7
Experiment 9	Emission spectra	New
Experiment 10	Metal Crystals	New
Investigation 11	Desktop materials	Inv 4
Investigation 12	Physical properties and structure	(Inv 4 Stage
Experiment 13	Bonding and Conductivity	Exp 8
Experiment 14	Bonding and Solubility	Exp 9
Experiment 15	The strength of intermolecular forces	(Exp 8 Stage 3)

Chemical reactions and stoichiometry

Context 3	Forensic Science	
Experiment 16	Empirical formula of magnesium oxide	Exp 10
Experiment 17	Water of crystallisation of barium chloride	Exp 11
Investigation 18	Determination of the formula of Epsom salts	New
Investigation 19	Conservation of mass	Inv 5
Investigation 20	Determination of molar mass	Inv 6
Experiment 21	Types of chemical reactions	Exp 12

Solutions and acidity

Context 4	Chemist solves bad hair day	
Experiment 22	Solubility rules	Exp 4
Investigation 23	Identify the unknowns I	Inv 2
Investigation 24	Identify the unknowns II	(Inv 1 Stage 3)
Experiment 25	Electrolytes and conductivity	Exp 5
Experiment 26	pH of materials around the home	Exp 19
Experiment 27	The right pH shampoo for your hair	Exp 20
Investigation 28	Determining the soil pH using Universal Indicator™	Inv 12

Experiment 29	Electrical conductivity of acids and bases	Exp 21
Investigation 30	Acid and base strength	Inv 13
Experiment 31	Acid reactions with some metal compounds	Exp 22
Experiment 32	Reactions of dilute acids with metals	Exp 23
Experiment 33	Metal and non-metal oxides	Exp 24
Investigation 34	Environmental and industrial processes	Inv 14

Energy changes and rates of reaction

Context 5	Reactions in and around the home and in the environment	
Experiment 35	Exothermic and endothermic processes	Exp 14
Experiment 36	Foods and fuels	Exp 15
Investigation 37	Designing and cold pack	Inv 8
Experiment 38	Measuring the rate of reaction	Inv 9
Experiment 39	Reactant concentration and rate of reaction	Exp 16
Experiment 40	Temperature and rate of reaction	Exp 17
Experiment 41	Catalysts and rate of reaction	Exp 18
Investigation 42	The decomposition of hydrogen peroxide	Inv 10
Investigation 43	Metallurgist needed – copper leaching plant	Inv 11

Organic chemistry

Context 6	Carbon - friend or foe?	
Experiment 44	Molecular models	Exp 29
Investigation 45	Combustion of hydrocarbons	Inv 16
Investigation 46	Reactivity of hydrocarbons – chemist at work	Inv 17

Section 2: Chemical understanding and problem solving

Exploring Chemistry Stage 2 Reference

Measurement in Chemistry

Set 1	Scientific notation and unit conversions	New
Set 2	Significant figures	New
Set 3	Random and systematic errors	New

Mixture, kinetic theory and gases

Set 4	Mixtures	Set 1
Set 5	Kinetic theory	Set 3
Set 6	Macroscopic properties of matter	Chem in Action p37

Atomic structure and bonding

Set 7	Elements and symbols	New
Set 8	Atoms and isotopes	Set 4
Set 9	Atomic structure and the Periodic Table	Set 5 + Set 8 Stage 3
Set 10	Ionisation energy	Set 9 Stage 3
Set 11	Periodic trends	Set 11 Stage 3
Set 12	Properties and structures of atoms	Chem in Action p55
Set 13	Compounds and formulae	Set 8
Set 14	Bonding and properties	New
Set 15	Uses, properties and structures	Set 7
Set 16	Properties and structures of materials	New
Set 17	Electron dot diagrams	Set 6
Set 18	Molecular shape	Set 10 Stage 3
Set 19	Intermolecular forces I	New
Set 20	Intermolecular forces II	Chem in Action (1-4 p88; 3, 6-8 p37)

Chemical reactions and stoichiometry

Set 21	Relative atomic mass and mass spectroscopy	New
Set 22	Molar mass	Set 9
Set 23	Moles, particles and mass	Set 10 + New
Set 24	Interpretation of formula	Set 11
Set 25	Percentage composition	Set 12
Set 26	Gas volumes	Set 18
Set 27	Ionic equations	Set 13
Set 28	Equations and observations	Set 21
Set 29	Stoichiometry	Set 14
Set 30	Stoichiometry and gas volumes	Set 19

Solutions and acidity

Set 31	Solutions	Set 2
Set 32	Solution concentrations	Set 15
Set 33	Reacting masses and gaseous and solution volumes	Set 20
Set 34	The pH scale	Set 16 Stage 3
Set 35	Solutions of acids and bases	Set 22
Set 36	Acid and base reaction stoichiometry	Set 23
Set 37	Acids and bases	Chem in Action p158

Energy changes and rates of reaction

Set 38	Energy changes	New
Set 39	Rates of reactions	New

Organic chemistry

Set 40	Naming and drawing hydrocarbons	Set 27
Set 41	Reactions of hydrocarbons	Set 28
Set 42	Organic chemistry	Chem in Action p198
