

2.3 Metallic Bonding

Problems Worksheet

1. Draw a diagram showing the metallic bonding in potassium metal.

2. Describe the structure of metals and metallic bonding.

3. Use your knowledge of metallic bonding to explain the following properties of metals:
- a. High melting points
 - b. Heat conductivity
 - c. Electrical conductivity
 - d. Metallic lustre
 - e. Malleable
4. Alloys are mixtures of metals with other elements. Explain why alloys have different properties to the pure metals.
