Trigonometry

Find the missing length.

1)

$$1.8 \times \tan(76) = 7.4\text{m}$$

6)

$$3.2 \div \tan(63) = 1.6\text{cm}$$

11)

$$4.3 \times \tan(58) = 6.9\text{cm}$$

2)

$$1.5 \div \tan(24) = 3.3\text{mm}$$

7)

$$8.6 \times \tan(16) = 2.4\text{cm}$$

12)

$$2.2 \times \tan(60) = 3.8\text{m}$$

3)

$$7 \div \tan(59) = 4.2\text{cm}$$

8)

$$2.5 \times \tan(73) = 8.3\text{cm}$$

13)

$$5.8 \div \tan(55) = 4.1\text{m}$$

4)

$$4.2 \times \tan(60) = 7.4\text{mm}$$

9)

$$8 \times \tan(25) = 3.7\text{mm}$$

14)

$$2.1 \times \tan(30) = 1.2\text{m}$$

5)

$$3.1 \div \tan(43) = 3.3\text{m}$$

10)

$$2.6 \div \tan(41) = 3\text{mm}$$

15)

$$4.5 \times \tan(52) = 5.8\text{cm}$$
