

Four in a Line-Algebra Addition and Subtraction

Each player takes it in turn to choose two cards (or the same card twice).

Add or subtract the expressions on the cards.

If the answer is on the grid and not covered, cover it with your counter.

If it is already covered - hard luck!

The first person to get 4 counters in a line, in any direction, wins.

$$(2a + 2b)$$

$$(2a - b)$$

$$(2a + 3b)$$

$$(a - 2b)$$

$$(2a + b)$$

$$(a + 3b)$$

$a + b$	a	$4b - a$	$4a + 2b$	$-2b$
$3a + 6b$	$a + 3b$	b	$2a + b$	$a - b$
$-4b$	$-a - 4b$	$4a + b$	$b - a$	$3a$
$3a - 3b$	$a + 5b$	$3b$	$3a - b$	$2b - a$
$4a + 4b$	$5b$	$a - 2b$	$4a$	$3a + 2b$
