

Trigonometry

Find the missing angle/length.

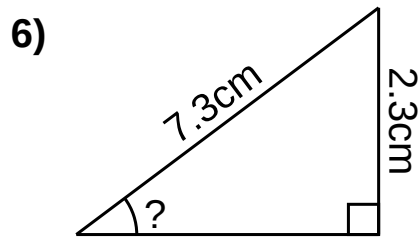

Trigonometry

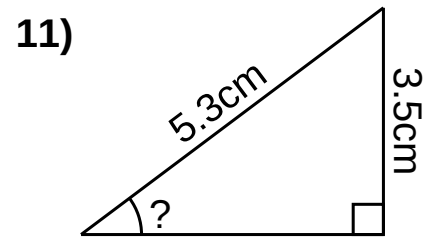

Find the missing angle/length.

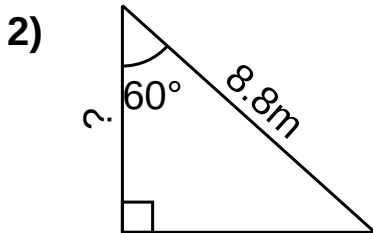

$$9.4 \times \sin(32) = 5m$$

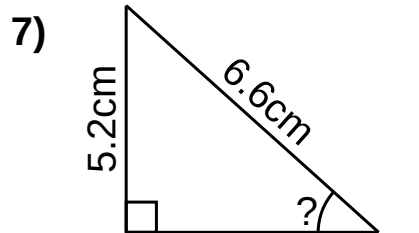

$$\sin^{-1}(2.3 \div 7.3) = 18^\circ$$

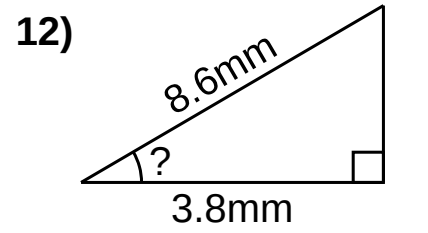

$$\sin^{-1}(3.5 \div 5.3) = 41^\circ$$

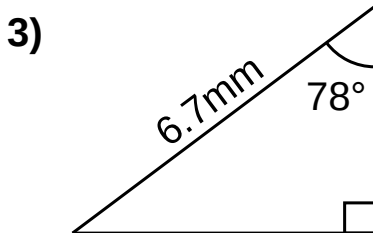

$$8.8 \times \cos(60) = 4.4m$$

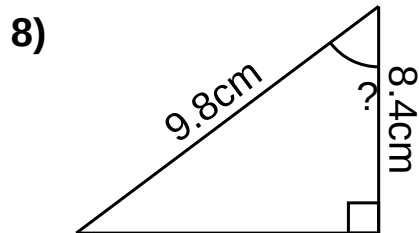

$$\sin^{-1}(5.2 \div 6.6) = 52^\circ$$

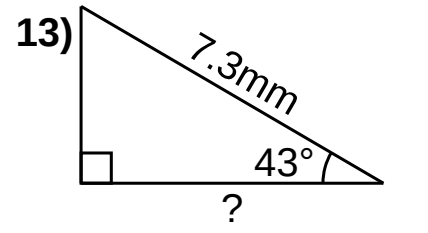

$$\cos^{-1}(3.8 \div 8.6) = 64^\circ$$

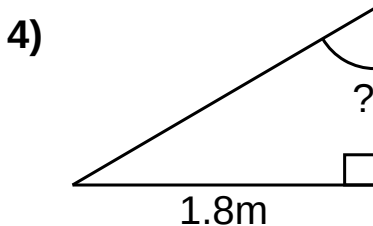

$$6.7 \times \cos(78) = 1.4mm$$

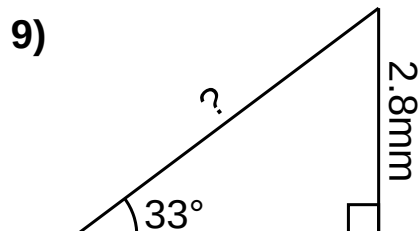

$$\cos^{-1}(8.4 \div 9.8) = 31^\circ$$

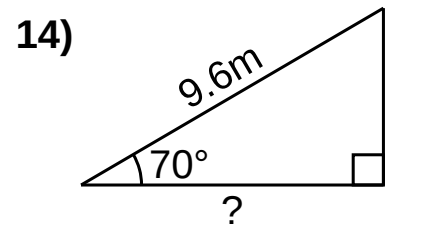

$$7.3 \times \cos(43) = 5.3mm$$

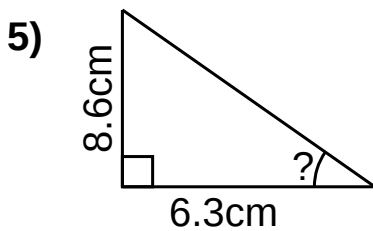

$$\tan^{-1}(1.8 \div 1.1) = 59^\circ$$

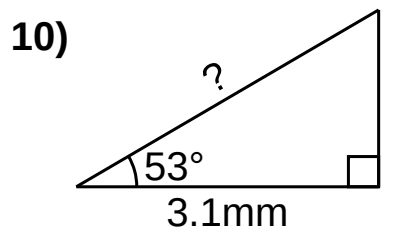

$$2.8 \div \sin(33) = 5.2mm$$

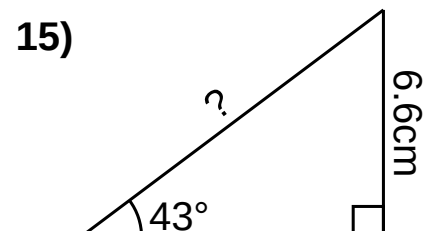

$$9.6 \times \cos(70) = 3.3m$$

$$\tan^{-1}(8.6 \div 6.3) = 54^\circ$$

$$3.1 \div \cos(53) = 5.2mm$$

$$6.6 \div \sin(43) = 9.6cm$$
