

TASK SHEET

Year: 11 General and Foundation English

Topic: Written Report - Local Issue Task 8

SOUTHERN HILLS
Christian College

Student:

Teacher:

Date Due: Semester 2

Dr van Rensburg

Achievement Standards:

Receptive Modes: (responding, creating)

Productive Modes: (responding, creating)

Achievement Standard focused on: Creating

Time allocation: periods

Conditions: In class

Weighting: 12.5%

Mark:

/ 80

Teacher Comment:

Task

- This task will be completed both in class and at home
- You will be required to select and research a local issue related to Western Australia
- Your notes will be formalised into a formal report format
- Report must be neatly and correctly word processed
- Evidence of note –taking essential
- All draft work to be submitted with final report

Task requirements:

We all live in the wonderful state of **Western Australia** which has the most rapidly growing population in Australia. We therefore have many issues and problems that we are faced with.

Your job is **to research an issue** facing the state you live in, the City of Perth or your local area by locating and gathering information from various sources.

You will also demonstrate use of your newly learnt “note taking skills” to summarise and take notes for your issue. Using these notes, you will write up your paragraphs and place them under appropriate headings.

Once you have gathered all your information, you will be required to prepare and word process a **WRITTEN REPORT** using the appropriate report format and layout.

With a rapidly growing population, there are many issues confronting all West Australians:

1. We live on the driest continent in the world and experts are now concerned about how we look after our water.
2. Climate change may be a global issue but it is also affecting West Australia – it is becoming drier
3. Fossil fuels causing global warming which should be replaced with renewable energies– solar, wind, marine and geothermal energies.
4. There is concern over our coal fired power plants. Brown coal is responsible for much of our carbon dioxide (CO₂).
5. Over 1500 land based species are being threatened with extinction.
6. We have rising sea levels, impacts of fertilisers are damaging our reefs and our fish stocks are depleting
7. Our population is increasing which puts pressure on the community and our resources
8. We use more water and energy per person than any other country in the world. We should be looking at more energy efficient houses and buildings and smart technologies
9. Lack of investment in public transport continues to frustrate many.
10. We, as citizens also need to act – we too can help make changes to the way we live and do things in our everyday life – we can’t just leave it to our politicians.

- CHOOSE YOUR ISSUE WISELY_
- WHAT ISSUES CONCERN YOU?
- WHAT ISSUE DO YOU WISH TO LEARN MORE ABOUT?

List of possible issues that could be examined and researched

Remember, your issue has to relate to our state of Western Australia, the City of Perth or the local area in which you live.

- Perth's rapidly growing population and its impact
- Traffic / freeway congestion
- Public Transport -pressure on our roads, trains and buses
- The number of road deaths on West Australian roads
- Violence at our train stations
- The new children's hospital
- One punch laws in WA
- Kangaroo culling
- Shark culling
- Rabbit control in rural areas
- The rising cost of living in Perth – we are the most expensive city in Australia!!
- Wind and solar power for energy
- Perth's water supplies – dams drying up, water restrictions
- Desalination plants for Perth
- Northbridge violence
- Uranium mining
- Gorgon Gas Project in the Kimberley
- Feral cats
- Bushfires
- Fiona Stanley Hospital – plagued with issues
- Homelessness on Perth streets
- High rentals and unaffordability to buy your own homes
- Parking – pay or not to pay
- Caring for our waterways – rubbish/pollution in the Swan River
- Rising oceans and erosion of our coastlines
- Pollution – smog in Perth
- Climate change – bush fires more prominent
- Loss of jobs in the mining industry
- Homelessness in Perth OR in the area you live
- Same sex marriage
- Under aged drinking/driving
- Cycling safety issues
- Unemployment in Perth – Northern corridor
- Protecting Ningaloo Reef
- Motor cycles on the roads – more accidents
- Drug problem – meth/ice biggest problem on Perth streets
- Medical marijuana

Format and Layout of Investigative Report

A report is an informative text written in impersonal style. Its purpose is to provide advice, facts and information based on research undertaken on a specific topic.

Your report will be organised using appropriate HEADINGS AND SUB-HEADINGS for each section and numbered accordingly.

A formal report should have the following arrangement:

1. TITLE PAGE

The Title Page must include:

- The subject/issue of the report
- Name of person who has written the report
- Date the report was started and finished
- May include a picture or illustration related to your issue

2. TABLE OF CONTENTS

The Table of Contents should be on a separate page. It helps the reader to find specific information and indicates how the information has been organised and what topics are covered. The table of contents should also include a list of figures and a list of tables if any are used in the report.

A sample contents page

CONTENTS

1.	Introduction	2
2.	Definition of advertising & marketing	3
3.	Origins and short history of advertising in W.A.	4
4.	The importance of advertising in our Community today	6
5.	Effects of television marketing in W.A.	7
	5.1 Advantages and Benefits	
	5.2 Disadvantages	8
5.	Impacts of marketing on Western Australian Consumers	9
6.	Graph showing placing of products in Supermarkets in Perth	10
	6.1 Graph explanation and interpretation	
7.	Case Study: Jan 2014	11
	<i>"Michael Jones failure to market"</i>	
	7.1 Explanation of article	14
8.	What is good marketing and advertising?	15

3. INTRODUCTION

This will clearly state what the report is about and it gives the reader a brief outline of what the report will include.

The introduction has three main components:

- a) The Purpose / Background which describes/explains events leading up to the existing situation, why the issue is so important. It provides information on the problem/issue that gave rise to the investigation.
- b) Method of Investigation states how the investigation was carried out
- c) Scope states the areas of investigation

A sample introduction:

The purpose of this report is to investigate the reasons behind the rise in computer gaming addiction among teenagers. The report also outlines recommendations and preventive measures for computer gaming addiction. A recent study on game technology (Grossberg 2014) shows that nearly 75% of teenagers in Perth play computer games regularly and the majority of them show signs of addiction. This is a growing concern and the Government would like to find out the reasons behind this trend.

Purpose & Background

Inform the reader what the report is about with some recently founded information

Questionnaires were issued to 100 teenagers from various educational institutions on May 5 2014 and some were also interviewed to get more in-depth views. References were also made to books and newspaper articles.

Method of Investigation

Tells us how the report was put together

Besides, the questionnaire profiles, this report looks into a brief history of gaming and four possible reasons for the rise in gaming addiction among teenagers: boredom, stress, society's influence and addictive game features as well as some recommendations and possible ways to control the problem.

Scope

Tells the reader what info. Will be found in the report

4. BODY AND CONTENT

This is where the reader learns about the issue. It answers the questions:

Who?
What?
When?

Where?
Why?
How?

This is an INVESTIGATIVE REPORT and should consist of all the information required to convince the reader that the conclusions and recommendations are valid and reliable.

1. Clearly define and explain the issue
2. May provide background / historical information to the issue
3. What is causing the problem re: this issue?
4. Your issue may contain arguments and information for and against the issue
5. Any benefits and advantages? Disadvantages? Adverse effects?
6. What is happening because of the problem/issue?
 - Impact and effects on the community/environment
 - Be clear about the area / location
 - Include a map if necessary or applicable
7. Who/what is being affected by this issue and how?
 - Communities / environment / individuals
8. Include: statistical information, graphs and data
 - These are placed immediately where they are first referred to in the text (not at the end or somewhere in the middle). This information must relate to what you are talking about in the appropriate section.
 - Any data you include in your report must be clearly explained
 - Note where the data comes from (source) and date
 - Tell the reader exactly what this graph/table is all about
 - In your own words, interpret and explain each graph/table
 - Make sure you note the relevance of the data to your issue
9. Include pictures, illustrations and diagrams. These help add interest and enhances your report.
 - These are placed immediately where they are first referred to in the text (not at the end or somewhere in the middle). All visuals used must relate to what you are talking about in the appropriate section.
 - Make sure each is clearly labelled stating or explaining what the visual text is showing or what it is about.
 - Note where the visual comes from (source) and data

5. CASE STUDY

A copy of the case should be included in report.

- In your own words, explain what the case / article is about.
This could be from a magazine, newspaper report, interview or current affairs program
- Apply: Who, what, when, where , why, how
- Summarise and explain what the case about and how is the case resolved?
- How is it relevant to your report issue?
- Note the source of the case study and date – make sure it is relevant to your issue!!

6. CONCLUSION

This clearly outlines how the issue is to be resolved and what's being done to rectify the problem/issue

The conclusion should be free from speculation (ideas for which you have presented no evidence), have no new thoughts or references introduced.

- How is the issue to be solved? Can it be solved?
- What is being done to try and resolve the problem?
- Are there any recommendations put into place?
- Control measures?
- Preventive measure being put into place (if any)?
- Are there any government (state or local) initiatives?
- Community involvement?
- Are there any positive results of any of the above measures?
- Include your own view / opinion re: your findings

7. REFERENCES

The list of references is an accurate listing all sources referred to in gathering your information.

This includes:
