SECTION TWO—SHORT RESPONSE

Question 1

[12 marks]

(a)

Any two trends	Marks	Any two relevant reasons	Marks
Increased consumption of poultry.	½ mark each (maximum 1)	Increased variety of value added products e.g. marinated, specialty outlets e.g. Lenards. Takeaway food outlets e.g. Nandos. Comparatively inexpensive. Versatile, quick recipes can be used.	½ mark each (maximum 1).
Increased consumption of pig meat.		Leaner, new fashioned cuts; variety of pork products available e.g. ham, bacon, salami; Culturally acceptable e.g. Asian cuisines Comparatively inexpensive.	
Decreased consumption of lamb and mutton.		Expensive (drought, prices of feed). Higher fat content. Cultural acceptance.	
Little variation in consumption of beef.		Beef industry has responded to concerns about fat content. Meat promotional campaigns e.g. iron content. Widespread cultural acceptance.	
Little consumption of other meats.		Kangaroo, emu, crocodile not as popular as other meats. Expensive. Niche market opportunities.	
Total			2

(b)

Nutrients [$\frac{1}{2}$ mark each] minimum 2 nutrients	Function [$\frac{1}{2}$ mark each] minimum 2 functions	Marks
High biological value protein	Growth and repair of body tissue	1 mark for each nutrient and function (maximum 2 marks)
Iron	Energy, oxygen transport in blood	
Zinc	Growth	
Vitamin B12	Healthy nervous system	
Total		2

(c)

Sensory property [½ mark each]	Description [½ mark each]	Marks
Appearance.	Fat melts causing browning on surface; or internal temperature increases: colour change; or shrinkage due to water loss and over-coagulation.	1 mark for each property and description (maximum 2 marks).
Texture.	Softening of muscle fibres tenderise; collagen converted to gelatin.	
Flavour.	Extractives pass out of meat during cooking and enhance the flavour; or Maillard reaction.	
Aroma.	Chemical substances in meat react when heated producing aromas.	
Total		2

(d)

Description (any four)	Marks	
Cheaper cuts of meat are just as nutritious as expensive cuts.	1 mark each (maximum 4)	
Buy meat suited to the planned cooking process		
Check for proper hygiene in shops (HACCP).		
Ensure that foods are stored in shop at correct temperature.		
Look at use-by date on packaged meat.		
Ensure that cooked meat and raw meat are not stored side by side.		
Undamaged packaging etc		
	Total	4

(e)

Definition of denaturation	Marks	2 methods [½ mark each]	Marks
The irreversible process of structural change of protein in meat.	1 mark	Cooking (heat). Marinating (acidity).	1
Total			2

Question 2
[6 marks]

Method of cooking <i>One example given of each method</i>	Changes in physical properties <i>One change for each method</i>	Effect on nutrient retention <i>One reason given for each method</i>	Marks
Wet methods Example: Boiling Stewing Steaming Poaching.	Comments on any of the following properties that apply to the vegetable and method used: ▪ texture ▪ colour ▪ aroma ▪ flavour.	Any of the following reasons that apply to the vegetable and are suitable: ▪ Vitamin C is water-soluble and destroyed by high temperatures ▪ B group vitamins are destroyed by heat and water ▪ Vitamin A is fat-soluble.	3
Dry methods Example: Grilling Barbecuing Dry frying Deep frying Baking Roasting Stir-frying.			3
Total			6

Question 3
[12 marks]
(a)

Point (any two)	Marks	Explanation	Marks
Not to break the yolk.	½ mark per point (maximum 1)	Fat in yolk will inhibit foaming.	½ mark per explanation (maximum 1).
Use separate bowls.		To avoid contamination of whites if yolk accidentally breaks.	
Place into clean bowl.		Any form of fat/oil will inhibit foaming.	
		Total	2

(b)

Factor [1 mark each]	Effect [1 mark each]	Marks
Temperature.	Room temperature—if too cold, won't foam.	1
Age.	New eggs hold their peaks and volume.	1
Equipment.	Clean and dry—any traces of oil/fat, won't foam.	1
Addition of sugar.	Needs to be added gradually, so sugar dissolves.	1
Total		4

Question 4
(a)

[5 marks]

Examples of factors (at least 2)	Explanation	Marks
Lack of time.	Any reasonable explanation is acceptable.	1 mark for each explanation.
Availability.		
Greater variety.		
Improved quality.		
Improved nutritive value.		
Limited cooking skills.		
Time.		
Facilities.		
Advertising.		
Exact portion size.		
	Total	2

(b)

Explanation: any three		Marks
Negative effects	Increase of sugar has led to an increase in dental caries, obesity, diabetes.	1 mark for each explanation.
	Increase of salt has led to an increase in heart disease.	
	Increase of fat has led to an increase in obesity, heart disease.	
Positive effects	There is now a range of 'lite' food products available; these include low fat, low sugar. and no salt/salt free	
Total		3

Question 5
(a)

[5 marks]

Description		Marks
Three preservation methods selected.	Student identifies an appropriate example for each method.	1 mark for each method and example.
Total		3

(b)

Description	Marks
Regular Freezing: changes in appearance, flavour and texture from the original food. Ice crystals, cell walls damaged.	2 marks for an explanation of changes to 2 of the physical properties.
Dehydration: water removed, reduced size, chewy type texture, colour intensity.	
Sugar: texture softened due to cooking, colour changes, flavour changes as sugar absorbed, sweeter aroma.	
Acids: texture softened due to cooking, colour changes, flavour infused.	
Canning: texture softened due to cooking, colour changes from cooking.	
Heat processing e.g. homogenisation – even fat globules, UHT flavour change.	
Smoking: flavour and aroma changes, texture change due to loss of moisture, colour changes.	
Total	2

Question 6

[4 marks]

(a)

Description	Marks
Functional foods are foods or ingredients that provide a health benefit to individuals beyond that of the traditional nutrients they contain.	1
Total	1

(b)

Examples of Functional Foods [½ mark each]	Reason for purchase [½ mark each] Any reasonable explanation is acceptable.	Marks
Hi-maize muffins or breads.	Increase fibre content and improve bowel function.	1
Logical margarine.	Contains plant sterols and esters which assist in lowering the cholesterol level in people who have high cholesterol level.	1
Total		2

(c)

Description	Marks
A health claim, made by manufacturers of a food product, describes the direct relationship between a specific nutrient and a particular disease e.g. food product reducing the risk of cancer.	1
Total	1

Question 7**[6 marks]**

Pressures	Explanation of response	Marks
Environmental.	Clean, green/organic food sustainable production practices used along the entire food production chain.	2
Economic.	Provision of food that provides value for the consumer's food dollar. Consumer purchasing power/convenience.	2
Social.	Women in the workforce e.g. home meal replacements. Population and household composition e.g. aging population requires more single serves. Knowledge and education: consumers more aware of health and environmental aspects of food production. Cultural diversity. Lifestyle TV programs and food publications. Food preparation knowledge and skills.	2
Total		6

Question 8**[6 marks]****(a)**

Examples of food safety aspects	Marks
Washing/preparation; pests.	1 mark each (maximum 3).
Danger zone–hot/cold holding.	
Cross contamination.	
Adequate cooking of protein-rich foods.	
Personal hygiene practices.	
HACCP operating procedures.	
Total	3

(b)

Examples of presentation and quality considerations	Marks
Use of quality ingredients–freshness; undamaged.	1 mark each (maximum 3).
Decorative and appealing in presentation–use of garnishes, arrangement.	
Salads are dressed appropriately to ensure quality is maintained; not overdressed; dressing may be provided separately.	
Cold salad ingredients are stored under refrigeration to maintain quality prior to serving.	
Warm salads combined just prior to serving.	
Labelling and responsibilities to diners regarding allergies.	
Total	3

SECTION THREE—EXTENDED RESPONSE (generic)**Question 11****[15 marks]**

Description	Marks
Clear details of design brief given.	2
All resources listed—human and non-human.	

Description	Marks
Target market is described.	1

Description	Marks
Lists needs and values of the consumer.	1
Lists needs and values of the producer.	1

Description	Marks
Clearly describes how the needs and values of both consumer and producer were addressed in the design and production process.	4-5
Describes how the needs and values of both consumer and producer were addressed in the design and production process.	2-3
Briefly describes how the needs and values of both consumer and producer were addressed in the design and production process or gives inaccurate or inadequate response.	0–1

Description
Organisation and implementation of production processes when working with others recognising hazards and adapting safe work practices.
The use of appropriate self-management and communication skills that facilitate individual and collaborative work.
Achievement of standards to meet target market.

Description	Marks
Clear examples given and detailed explanation of how management and communication skills were used.	4-5
Examples given with some detail of how management and communication skills were used.	2-3
Brief explanation given or gives inaccurate or inadequate response.	0–1

SECTION FOUR: CONTEXT—SPECIFIC EXTENDED RESPONSE
[15 marks]
HOSPITALITY
Question 12
[15 marks]

Description	Marks
Identifies and describes the target market.	1
Description	Marks
Type of meal is explained (buffet, sit-down etc.).	2
Description	Marks
Three course menu shows innovation and is suitable for function.	1–2
Variety and balance of flavours, textures, aromas, colours.	1–2
Description	Marks
The following factors have been considered:	
Functional—healthy meals, facilities to prepare, skills available.	2
Aesthetic—colour, texture, size.	2
Social—people eating together, culture, traditions.	2
Environmental—recycling, wastage, food scraps.	2

Question 13
[15 marks]

Response [$\frac{1}{2}$ mark each] 3 only	Description [$\frac{1}{2}$ mark each] 3 only
Fresh, whole foods.	Good source of nutrients, high in fibre.
Less fat, sugar and salt.	Can lead to health problems e.g. heart disease, obesity, dental caries, diabetes.
Variety of foods.	Variety to supply a range of nutrients, flavours, textures.
Portion size.	To allow for nutrients Large portions = overweight, small portions = underweight.

Response takes the following points into account for both courses:	
Innovative	Food trends and fashion considered, presentation style.
Time	Meal is to be prepared in a short amount of time. Long cooking methods would not be used.
Healthy meals	Chooses healthy alternatives—brown rice, multigrain rolls, low fat milk, margarine.
Balance	Variety of foods and food groups, colour and texture.

Factors	Response (2 marks for each factor)
Functional	- low in fat, salt, sugar - appeal to adolescents - fresh products, little processed foods - little wastage, use leftovers for lunch.
Aesthetic	- visual impact - aroma - flavours - textures.
Social	- eat together, sharing preparation of meal - talking at table, sharing day.
Environmental	- compost food scraps - no wasted packaging from takeaway option - recycling cans.

PRODUCT DEVELOPMENT

Question 14

[15 marks]

Healthy meal deals

Factors (any three) Maximum 3 marks
Healthy foods and drink—balanced to include food groups and meet canteen guidelines.
Suitability—for primary school children.
Variety of colour and texture/ appealing.
Packaging/advertising.

Food and drink	Reason for choices made
1 mark for each food and a drink listed (up to 2 marks).	1 mark for each reason given (up to 2 marks).
Examples- • Grilled teriyaki chicken sandwich with fruit and water as the drink. • Cheese and salad sandwich with fruit juice and frozen yoghurt. • Individual pizzas (healthy) with fruit kebabs or jelly cups or vegetable sticks with dips.	

Factor	Response (2 marks for each factor discussed)
Functional	• Appeal to children. • Promotes a healthy lifestyle.
Economic	• Low cost ingredients-seasonal. • Value for money.
Social	• Encourages healthy eating. • Eating together. • Advertising.
Environmental	• Recycling waste. • Organic food choices. • Packaging.

Question 15

[15 marks]

Canteen choices

Description	Marks
Adolescent high school students. Eating issues of adolescents (briefly).	1

Description	Marks
The wrap should indicate: ▪ innovation, adhering to canteen guidelines ▪ a range of fresh products, high in vegetables and low fat protein fillings, low fat sauces e.g. mayonnaise, hummus ▪ description of label ▪ labelling requirements e.g. price, weight, list of ingredients	(½ mark each).

Packaging	description of packaging. purpose of packaging choice.	1
Promotion	range of ways e.g. posters, advertise in school newsletters. pre-testing.	1

Factor	Description (2 marks for each factor discussed)
Functional	• adolescent dietary requirements. • promotes a healthy lifestyle.
Economic	• low cost ingredients—seasonal. • value for money.
Social	• encourages healthy eating. • eating together.
Environmental	• disposal. • packaging.

Description	Marks
Describes ways to evaluate the success of the product: • surveys • observations • feedback sheets • was there any product left over? • did the products sell quickly? • how could the product be improved?	2

NUTRITION AND HEALTH PROMOTION

Question 16

[15 marks]

Description	Marks
Adolescent high school students, typical concerns or perceptions about types of food, when they eat who decides what they eat.	1

2 strategies	Marks
For each strategy the student should describe what it is, what it aims to do, how it is suited to the target audience, and links to the healthy eating campaign.	2 marks each strategy.

Factor	Response (2 marks for each factor discussed)
Nutritional	• adolescent dietary requirements. • promotes a healthy lifestyle.
Economic	• low cost ingredients – seasonal, fresh produce. • value for money.
Social	• encourages healthy eating. • eating together, peers.
Environmental	• waste disposal. • packaging.

Responses may include:	Marks
• surveys • oral feedback • feedback sheets • observations to see if more fruit and vegetables are being eaten in schools • is the canteen selling more fruit and vegetables?	2

Question 17**[15 marks]****Convenience and fast foods**

Response	Marks
Identifies and describes the target audience: busy lifestyles, less exercise, longer working hours, increased income. Increase demand for healthier options in fast food outlets.	1

Response	Marks
Promotional strategy aims to raise awareness of the health message. This may be achieved by: verbal announcements, advertising, promotional products, food demonstrations and tasting, educational activities, recipes. Health message and strategy described.	3

Response (1 mark for each factor discussed)	Marks
Nutritional: • sugar, salt and fat content of foods • size of meal—regular, super size • low nutritive value.	2
Economic: • high cost of convenience foods • social cost of disease to community.	2
Social: • different cultures and religions • provide wide choice to consumer demand • greater peer pressure to purchase • easy to obtain or prepare • media promotion via magazines, TV, radio, internet.	2
Environmental: • litter • storage of leftovers • use of water, energy to prepare food • meal deals come with various packaging and plastics • disposal of kitchen/individual by-products and leftovers	2

Describe ways to evaluate the success of the strategy and identify improvements.

Response	Marks
Describes ways to evaluate the success of the product: • surveys • observations • feedback sheets • how could the strategy be improved?	2

Stage 2 Exam question mapping to course content

Question No.	Nature of food			Processing food			Food in society		
	Food as a commodity	Properties of food	Nutrition	Technology process	Skills with food	Food practices and processing	Issues, trends and innovations	Laws and regulations	Consumer and enterprise relationships
