17	D
18	C
19	B
20	D

SECTION TWO—SHORT RESPONSE

Question 1

[8 marks]

a) Name of electrical appliance:

Description	Marks
Food processor	1

b) Give two uses for this electrical appliance when preparing food and in each case explain the advantages of using it, compared to manual handling.

Any two uses	Any two advantages	Marks
Mixing Blending Pureeing Grating Slicing Chopping Kneading	Quicker Less physical energy used Less effort Can vary the speed Pulse button allows for greater control over final texture of food Uniform chop	4

c) List three (3) safety precautions that should be taken when using this electrical appliance.

Description (any three)	Marks
Turn power off when not in use	3
Make sure your hands are dry	
Keep lid on while in use	
Do not exceed the bowl capacity	
Never use fingers to push food down the feed tube	
Don't remove lid until blade has stopped	
Never immerse the motor in water	
Do not leave the blade in hot soapy water where it can't be seen	

Question 2**[7 marks]**

Choose a vegetable. Complete the following table showing one dry and one wet cooking method that can be used for preparing the chosen vegetable and explain how this cooking method affects nutrient retention and the change in physical properties of the vegetable.

The vegetable I have chosen is:

Description	Marks
Correctly identifies a vegetable (not fruit, herb etc.)	1

For copyright reasons this table cannot be reproduced in the online version of this document, but may be viewed at the link below.

Table adapted from: Victorian Curriculum and Assessment Authority. (2006). *Food and Technology: Written examination: Victorian Certificate of Education 2006* (p. 7). Retrieved October, 2007, from <http://www.vcaa.vic.edu.au/vce/studies/foodtech/pastexams/2006food-tech-w.pdf>.

Question 3**[6 marks]**
[12 marks]

[Adapted from: Victorian Curriculum and Assessment Authority. (2006). *VCE VET Hospitality (Operations) Commercial Cookery: Written examination: Victorian Certificate of Education 2006* (p. 10, q. 6a, b). Retrieved October, 2007, from <http://www.vcaa.vic.edu.au/vet/programs/hospitality/pastexams/2006/2006vethosp-cc-w.pdf>]

For copyright reasons this question, including parts a and b, cannot be reproduced in the online version of this document, but may be viewed at the link above

a)

Description (any two)	Marks
Not to break the yolk.....fat in yolk will inhibit foaming	4
Use separate bowls..... to avoid contamination of whites if yolk accidentally breaks	
Place into clean bowl....any form of fat/oil will inhibit foaming	

b)

Factor [1 mark each]	Effect [1 mark each]	Marks
Temperature	Room temperature—if too cold, won't foam	2
Age	New eggs hold their shape and volume	2
Equipment	Clean and dry – any traces of oil/fat, won't foam	2
Addition of sugar	Needs to be added gradually, so sugar dissolves	2

Question 4

Explain what FSANZ stands for and give one reason why it is important in the food industry.

[6 marks]

Food Standards Australia and New Zealand [5 marks]

Reason for importance (any one)	Marks
It develops and reviews standards for food safety, maximum residue limits, manufacturing, labeling, processing and primary production	1
Provides information to consumers to enable better consumer choice	
Coordinates national food surveillance, enforcement and food recall	
Conduct consumer and industry research	
Undertake dietary exposure modelling and scientific risk assessments	
Provide risk assessment advice on imported food	

Question 5

- a) Identify and discuss at least two (2) factors that have led to an increase in the number of convenience foods available to the consumer.

Examples of factors (at least 2)	Discussion	Marks
Lack of time		4
Availability		
Greater variety		
Improved quality		
Improved nutritive value		
Limited cooking skills		
Time		
Facilities		
Advertising		
Exact portion size		

- b) List and evaluate three (3) effects that the increased availability of convenience foods may have on the health of individuals.

Response – Any three responses		Marks
Negative effects	Increase of sugar has led to an increase in dental caries, obesity, diabetes	6
	Increase of salt has led to an increase in heart disease	
	Increase of fat has led to an increase in obesity, heart disease	
Positive effects	There is now a range of 'lite' food products available; these include low fat, low sugar and no salt/saltfree	

Question 6**[8 marks]**

- a) Identify and describe at least three potential food safety hazards from the passage. Explain how each hazard can affect the safety of food.

Hazard (any three)	[3 marks]	Description of each hazard	[3 marks]
boards used for cutting chicken and vegetables		cross contamination from chicken to vegetables	
uncovered chicken placed at top of fridge		drips onto other food in fridge allowing the spread of bacteria	
fruit/veg in bowl in kitchen sink		bacteria from them being cut on chicken board multiplies in warm conditions	
fridge not closing properly		incorrect fridge temperature, not cool enough	
boards in boot of car		Unclean, exposed to the elements	

- b) Explain the meaning of cross contamination. Give one example of how this could occur in the kitchen.

Cross contamination refers to the transfer of bacteria to food by contact with another food or non-food item. Examples could include:

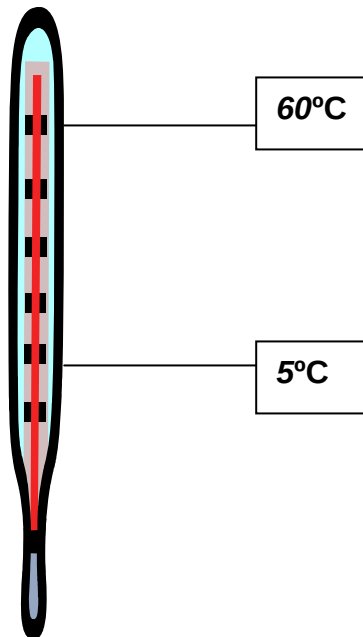

Description	Marks
Cooked food coming into contact with raw food	2
Equipment and hands not being washed thoroughly	
Using dishcloths on the floor and then on the work bench	

Question 7

[6 marks]

Temperature Danger Zone for food.

- a) Fill in the temperatures on the diagram below to show the temperature danger zone. [2 marks]

- b) Explain the safe method of thawing frozen meat. Why is this important and what could happen if meat was thawed incorrectly?

Description	Marks
Thaw frozen meat in the refrigerator.	1
Make sure meat juices can't drip on any other food in the refrigerator.	1
Reason: bacteria can multiply when conditions become warm enough	1

- c) Why should meat be cooked soon after thawing?

Description	Marks
To kill bacteria.	1

Question 8

[6 marks]

[Adapted from: Victorian Curriculum and Assessment Authority. (2006). *VCE VET Hospitality (Operations) Commercial Cookery: Written examination: Victorian Certificate of Education 2006* (p. 10). Retrieved October, 2007, from <http://www.vcaa.vic.edu.au/vet/programs/hospitality/pastexams/2006/2006vethosp-cc-w.pdf>]

For copyright reasons parts a, b and c of this question cannot be reproduced in the online version of this document, but may be viewed at the link above.

- a)

Description	Marks
The preservation technique selected:	Student identifies an appropriate technique 1
The food product selected:	Student identifies an appropriate food 1

b)

Describes how the preservation technique prevents spoilage of chosen food	Marks
Freezing – food kept at low temperature	2
Dehydration – removal of moisture	
Sugar – fruits cooked, as in jams	
Acids – pickling, chutneys	
Canning – food heated and sealed	
Heat processing – vacuum packing	
Smoking – hams, fish	

c)

Description	Marks
Describes two impacts on the texture, colour, flavour and aroma of the chosen food.	2
Describes one impact on the texture, colour, flavour and aroma of the chosen food.	1

Question 9

[6 marks]

- a) For copyright reasons part a of this question cannot be reproduced in the online version of this document, but may be viewed at the link below.

[Adapted from: State Examinations Commission. (2002). *Home Economics (Scientific and Social) Higher Level: An Roinn Oideachais Agus Eolaíochta: Leaving Certificate Examination, 2002* (p. 2). Retrieved October, 2007, from <http://www.examinations.ie/archive/exampapers/2002/LC030ALPO00EV.pdf> (last sentence of q. 4)]

Description (any 3)	Marks
Replace lost nutrients during processing	3
Increase food value of a manufactured food product	
Increase shelf life of product	
Fortify	

- b) Give one example of an additive and identify the food it is used in. Give reasons for its addition.

Examples:

[3 marks]

Additive [1 mark]	Food it is used in [1 mark]	Reasons for addition [1 mark]
Vitamins A and D	margarine	fortify
Iron, vitamins and calcium	white flour	fortify
B group vitamins and iron	breakfast cereals	fortify
Vitamin C	fruit drinks	lost in processing

Question 10**[6 marks]**

- a) Explain the difference between food spoilage and food poisoning.

[4 marks]

Description	Marks
Explains food spoilage is when the physical properties of food deteriorate making food unpleasant to eat whereas food poisoning is an illness that occurs after eating contaminated food.	4
Provides a partial explanation the difference between food spoilage and food poisoning.	1-3

- b) Identify one of the main causes of food spoilage and explain how this occurs.

[2 marks]

Identifies one of the following causes:	Marks
The action of naturally occurring enzymes	
Absorbing moisture from the air—biscuits becoming soft	
Moulds—airborne	
Yeasts—airborne	
Heat	
Age	

SECTION THREE – EXTENDED RESPONSE

Question 1

[20 marks]

Select a food-related production or project undertaken during this course where you used the technology process.

- a) Briefly outline the design brief and list the human and non-human resources that you used.

Response	Marks
Clear details of design brief given	1
All resources listed – human and non-human	2

- b) Describe the target market.

Response	Marks
Target market is identified	1

- c) List the needs and values of the consumer and producer.

Response	Marks
Lists needs and values of the consumer	2
Lists needs and values of the producer	2

- d) Identify and analyse how the key needs and values of the consumer and producer were addressed in the design and production process.

Response	Marks
Clearly describes how the needs and values of both consumer and producer were addressed in the design and production process	5–6
Describes how the needs and values of both consumer and producer were addressed in the design and production process	3–4
Briefly describes how the needs and values of both consumer and producer were addressed in the design and production process	1–2

- e) Using specific examples from the food-related production or project, explain in detail how you used effective management and communication skills to:

- organise production processes
- manage issues while working with others or in teams
- ensure that quality requirements of the target market were met.

[6 marks]

Scope of response includes
organisation and implementation of production processes when working with others recognising hazards and adapting safe work practices.
the use of appropriate self management and communication skills that facilitate individual and collaborative work.
achievement of standards to meet target market.

Response	Marks
Clear examples given and detailed explanation of how management and communication skills were used	5–6
Examples given with some detail of how management and communication skills were used	3–4
Brief explanation given	1–2

SECTION FOUR: CONTEXT SPECIFIC EXTENDED RESPONSE

This section is divided into **THREE** contexts:

Hospitality

OR

Product development

OR

Nutrition and health promotion.

Complete **ONE CONTEXT ONLY**. There are **TWO** questions per context. Answer **ONE** question only. Allow approximately 30 minutes. [20 marks]

HOSPITALITY

Question 1

[20 marks]

Special function to demonstrate hospitality skills

Design an innovative menu suitable for a function to be prepared and served by your class. The meal should include three (3) courses and be served with hot or cold drinks. It should be economical to produce (no prawns or crayfish!)

Select one of the following themes for your function:

- Youth Week to celebrate youth achievements
- Promotion of local produce
- Melbourne Cup luncheon
- Farewell meal for visiting overseas or regional students
- Thank you to local businesses and community people to promote the school.

Identify the target market and number of guests

Response	Marks
Identifies the target market	1
Number of attendees	1

Identify the type of meal to be served

Response	Marks
Type of meal is identified (buffet, sit-down etc.)	1

Create an innovative menu incorporating important considerations when designing menus.

Response	Marks
Menu shows innovation and is suitable for function	1–3
Three courses are included	1–3
Variety and balance of flavours, textures, aromas, colours	1–3

Evaluate your menu explaining how the functional, aesthetic, social and environmental considerations that have influenced your decisions have been met.

Response	Marks
The following factors have been considered:	

Functional – healthy meals, facilities to prepare, skills available	2
Aesthetic – colour, texture, size	2
Social – people eating together, culture, traditions	2
Environmental – recycling, wastage, food scraps	2

Question 2

[Adapted from: Perraton, G., et al. (2005). *Food and technology 1*. Milton, Qld: John Wiley & Sons, p. 191]

‘Meals in a Moment’

For copyright reasons this question, including parts a–d, cannot be reproduced in the online version of this document.

a)

[4 marks]

Response [1 mark each]	Description [1 mark each]
Fresh, whole foods	Good source of nutrients, high in fibre
Less fat, sugar and salt	Can lead to health problems e.g. heart disease, obesity, dental caries, diabetes.
Variety of foods	Variety to supply a range of nutrients, flavours, textures.
Portion size	To allow for nutrients Large portions = overweight, small portions = underweight

b)

[6 marks]

Entrée and main or main and desert

Response takes the following points into account for both courses:

Time	Meal is to be prepared in a short amount of time long cooking methods would not be used
Healthy meals	Chooses healthy alternatives, brown rice, multi-grain rolls, low fat milk, margarine
Balance	Variety of foods and food groups, colour and texture

c)

[8 marks]

Factors	Response (2 marks for each factor)
functional	• low in fat, salt, sugar • appeal to adolescents • fresh products, little processed foods • little wastage; use leftovers for lunch
aesthetic	• visual impact • aroma • flavours • textures
social	• eat together, sharing preparation of meal • talking at table sharing day
environmental	• compost food scraps • no wasted packaging from take-away option • recycling cans

d)

[2 marks]

Description	Marks
Animal protein to be replaced with either: • Cereal foods – wholegrain bread rolls or pasta • Dairy foods – cheese or milk • Vegetable food – butter beans	1
Explains substitution	1

PRODUCT DEVELOPMENT

Question 1

[20 marks]

Healthy Meal Deals

Design a 'healthy meal deal' to be sold in a local primary school canteen for lunch. This is to be part of a 'Healthy Eating Campaign'. They are to be economical to produce and cost no more than \$5.00 each.

- a) Discuss important factors to consider when designing the meal deal.

Response	Marks
Healthy foods and drink—balanced to include food groups	1
Suitability—for primary school children	1
Variety of colour and texture/ appealing	1
Packaging	1
Advertising	1

- b) List foods and drink to be included in the 'meal deal' and justify the choices you have made.

[8 marks]

Food and drink	Reason for choices made
1 mark for each food and a drink listed (up to 4 marks)	1 mark for each reason given (up to 4 marks)
Examples- - Grilled teriyaki chicken sandwich with fruit and water as the drink - Cheese and salad sandwich with fruit juice and frozen yoghurt - Individual pizzas (healthy) with fruit kebabs or jelly cups or vegetable sticks with dips	

- c) Consider functional, aesthetic, social, environmental, ethical, political and health issues that have influenced your decisions.

[7 marks]

Issues	Response (1 mark for a response associated with each issue)
functional	• Appeal to children facilities to prepare • Season, • Promotes a healthy lifestyle
aesthetic	• Presentation • Colour • Texture.
social,	• Encourages healthy eating • Eating together
environmental	• Composting food scraps • Packaging
ethical	• Cost • Suitability for health concerns • Advertising
political	• Health campaign-health concerns of nation
health	Foods used • fresh fruits • vegetables • low fat • salt • sugar

Question 2

[20 marks]

Design a “healthy – fresh is best” food wrap product to be sold at the local high school canteen using a variety of food products. The products are to be low costing.

a) Identifies the target market (adolescent high school students)

[1 mark]

b) Draw and label the wrap to meet the design criteria.

[5 marks]

Response	The design should indicate: - innovation - range of fresh products, high in vegetables and low fat protein fillings - low fat sauces e.g. mayonnaise, hommus - range of filling ingredients e.g. lettuce, carrot
----------	--

c) Identify and discuss and evaluate the food presentation and packaging of this product for the market.

[4 marks]

Presentation	Promotion—range of ways e.g. posters, advertise in school newsletters Pre-testing Posters
Packaging	Wrapping choices PMI chart to evaluate choices

d) Justify your choice by considering the target market and the functional, aesthetic, social and environmental issues that have influenced your decision.

[5 marks]

Target market - High school students - Adolescent's dietary requirements Functional: - Dietary requirements of High School students - Season of year - Facilities to prepare - Availability of products	Social - Culture and religions e.g. vegetarian - Provide choices - Concern for healthy weight range of children - Expectations of society to encourage healthy eating at school and home - Allergies e.g. nuts and how to cater for
Aesthetic - Presentation of recipe and food: colourful - Suitable to health concerned parents and P&C - Visual presentation of	Environmental - Storage of food products at school - Food safe program for preparation of food - Wastage

- e) Describe ways to evaluate the success of the product and identify product improvements.

[5 marks]

Response	Marks
Describes ways to evaluate the success of the product • Surveys • Observations • Feedback sheets • Was there any product left over? • Did the products sell quickly?	1–3
Identifies product improvements • How could the product be improved?	1–2

Question 1

[20 marks]

Promoting Fruit and Vegetables for Children

Design an innovative plan for a health campaign to promote the inclusion of more fresh **fruit and vegetables** in children's diets. The campaign is to be aimed at Western Australian schools and produced at minimum cost.

Outline of plan: includes design criteria.

[6 marks]

- a) In your plan, consider functional, aesthetic, social, environmental, ethical and political issues that have influenced your decisions.**

[12 marks]

Plan to include any six of the following: <i>[1 mark each]</i>	Reasons for each choice made <i>[1 mark each]</i>
Innovation Clear goals The importance of having fresh fruit and vegetables in the diet Promotion Student activities Recipes Packaging of promotion Including fruit and vegetables at school Recycling waste products from promotion	

- b) Identifies strategies for measuring the success of the campaign.**

[2 marks]

Responses may include	Marks
- surveys - oral feedback - feedback sheets - Observations to see if more fruit and vegetables are being eaten in schools - Is the canteen selling more fruit and vegetables	2

Question 2

The media, busy life style, income and the availability of convenience and fast food have encouraged poor diets, leading to increased levels of obesity in Australia amongst children and adults.

Evaluate this statement in relation to the societal issues and trends that impact on the health and wellbeing of individuals and communities.

Discuss the impact of the issues and trends on the supply of state and federal resources and services.

In your response consider social, health, nutritional, environmental and economical issues.

[20 marks]

Response to include the following issues:

Social - Different cultures and religions - Provide wide choice to consumer demand - Greater peer pressure - Less parental intervention as parent/s working - Easy to obtain - Media promotion via magazines, TV., radio, internet	Nutrition - Sugar, salt and fat content of foods - Size of meal—regular, supersize - Increase demand for healthier options e.g. chicken and salad on wholemeal rolls in fast food outlets like McDonalds - Low nutritive value
Environmental - Litter - Storage of leftovers - Use of water, energy to prepare food - Meal deals come with various packaging and plastics - Disposal of kitchen/individual by products and leftovers	Health - Support services in the community - Children left to look after self at home whilst parents work - Increase in diet related diseases - Increase in allergies to foods e.g. nuts - Increase concern of higher instances of lack of exercise - Low self esteem - Higher incidence of some cancers amongst obese people - Increased risk of heart disease and high blood pressure
Economical - High cost of convenience foods - Social cost of disease to community - Absences from work - Employment—jobs in the fast food industry
