

Index practice

Due date

Mon 22 Mar 10:00am

1. Write $3^4 \times 3^{10}$ in simplest index form.
-

2. Fill in the blank to make the equation true.

$$3^5 \times 3^{\boxed{}} = 3^7$$

3. Write $5^{10} \div 5^5$ in simplest index form.
-

4. Write $37^{30} \div 37^{18}$ in simplest index form.
-

5. Using index laws, evaluate $3^9 \div 3^4$.
-

6. Fill in the blank to make the equation true.

$$11^{10} \div 11^{\boxed{}} = 11^4$$

7. Fill in the blank to make the equation true.

$$31^{\boxed{}} \div 31^{21} = 31^{13}$$
