

You have just been employed at your local pet shop, and your first customer is your maths teacher.

I need a rabbit hutch – simple.

I do however, have specific requirements.

- 1) My rabbits Floppy and Jasmine like lots of room to hop around in – at least 120m^3
- 2) Obviously the more room the better but my garden is very small so I can only fit a hutch which is 160m^3 or less
- 3) I would prefer something that looks exciting and not just a boring cuboid shaped one; if the hutch is cuboid shaped – I want it to have something attached to it to make it look nicer.
- 4) I can afford to spend up to \$105, but that includes the hutch and the accessories for it. I need to also buy sawdust, a food bowl and a water bottle.

You can work with another colleague, providing they share their desk with you at work. However, that means you have to split the commission.

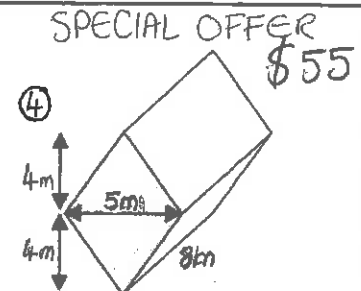

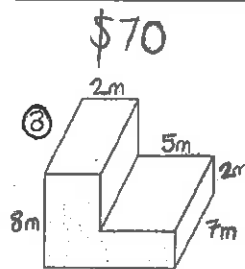

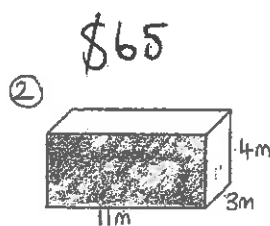

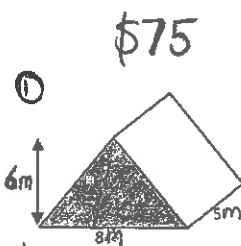

Find a home for Floppy and Jasmine.

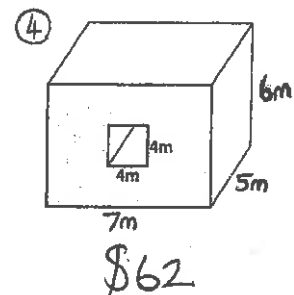

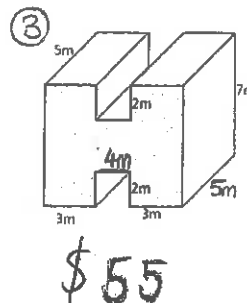

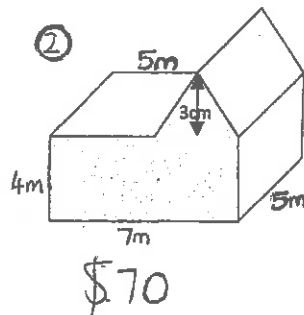

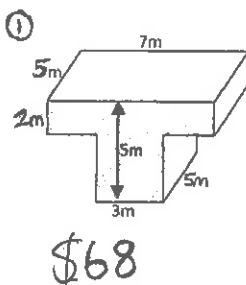

REMEMBER:

- ♦ They need at least 120m^3 to roam around but I have room in my garden for up to 160m^3 .
- ♦ Don't go over budget – I have a total of \$105 to spend on the hutch, sawdust, bowl and drinking bottle.
