Class: _____

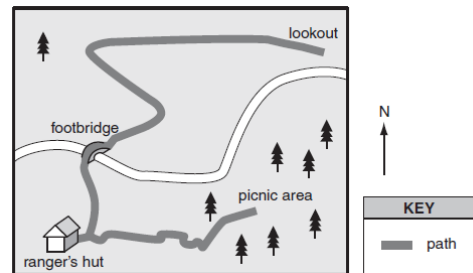

WEEK 4

1. The area of a farm is $56\,823\text{ km}^2$. What is this area to the nearest thousand square kilometres?

2. $36 \div 12 = 12 \div \square$ What is $\square$?

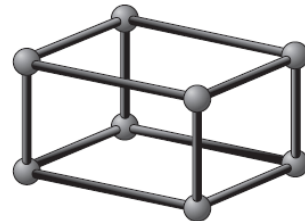

3. Lucy walked along the path from the ranger's hut to the lookout. Which set of directions best describes her path to the lookout?

- ☐ north, north-east, north-west then west
- ☐ north, north-west, north-east then west
- ☐ north, north-east, north-west then east
- ☐ north, north-west, north-east then east

4. Ruth made this model using 8 foam balls for the vertices and 12 sticks for the edges. How many foam balls and sticks would Ruth need to make a square-based pyramid?

- ☐ 5 foam balls and 8 sticks
- ☐ 5 foam balls and 6 sticks
- ☐ 4 foam balls and 6 sticks
- ☐ 6 foam balls and 9 sticks

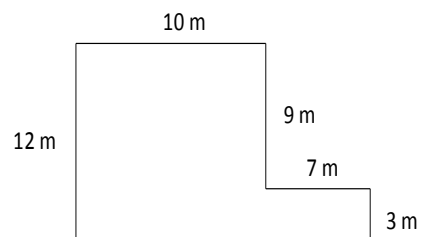

5. The number of customers at a store in an hour (over 5-minute intervals) was recorded:

0, 1, 2, 2, 4, 5, 7, 7, 7, 8, 8, 9

What was the median?

6. What is the perimeter of this shape?

7. What fraction of 36 is 24?

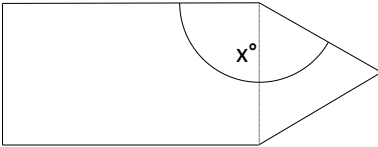

8. Which of these numbers is closest in value to $\frac{221}{272}$?

- ☐ 0.5
- ☐ 0.6
- ☐ 0.7
- ☐ 0.8
- ☐ 1.2

9. After 6 games, Shaun's average (mean) number of points scored per game was 3.5. How many points had Shaun scored all together?

10. A positive number was multiplied by itself. The answer was 8649. What was the number?
11. Together a loaf of bread and a packet of biscuits cost \$5.50. The bread cost 50 cents more than the biscuits. How much was the bread?

12. This diagram is made up of a rectangle and an equilateral triangle. What is the value of x ?

13. $200 = 1000 - \frac{n}{4}$. What is the value of n ?
14. Yesterday, Alison completed 25 laps of the pool. Today she completed 30 laps. What percentage increase is this?
15. Jess and Jo share \$3600 in the ratio of 5 to 4. What is Jo's share?

16. Mike sells cars. His weekly salary, S dollars, is calculated using this rule:

$$S = 500 + 0.02V$$

where V is the total value in dollars of the cars he sells in that week. Last week, the total value of the cars Mike sold was \$120 000. What was Mike's salary last week?

17. Which expression is equivalent to $3(1 - p) - p$?

$3 - 2p$

☐

$3 - p^2$

☐

$3 - 4p$

☐

$3 + 2p$

☐

18. $7f + 8 = 5f - 4$. What is the value of f ?

19. A polygon has two angles of 90° and its remaining angles are all 135° . What type of polygon is it?

Pentagon

☐

hexagon

☐

octagon

☐

decagon

☐
