

Name: _____

Class: _____

WEEK 5

1. Helen has 24 red apples and 12 green apples. What fraction of the apples are green?

$$\frac{1}{2}$$

$$\frac{1}{3}$$

$$\frac{1}{4}$$

$$\frac{1}{12}$$

2. Which number is the largest?

0.3

0.05

0.006

0.123

3. Kevin made these 2 objects by gluing cubes together face-to-face.

He then joined the 2 objects together. Which object below could **not** be made using Kevin's 2 objects?

4. Five students compared their heights. The diagram below shows their results. Which student is the tallest?

5. Write 5 cents as a fraction of a dollar, in simplest form.

6. Which is equivalent to $3t + 2t + 4t$?

9t

24t

$9t^3$

$24t^3$

7. Which of these designs looks identical after a quarter turn?

8. Which position is closest to $\frac{2}{3}$ on this number line?

A

B

C

D

9. What is $12 \div \frac{1}{2}$?

10. For which object is the sum of the number of edges and number of vertices three times the number of faces?

triangular prism

☐

triangular pyramid

☐

rectangular prism

☐

rectangular pyramid

☐

11. Terry bought 7 boxes of pencils. In total this was 84 pencils. Which equation correctly shows n as the average number of pencils?

$84 \times 7 = n$

☐

$84 - 7 = n$

☐

$n \div 7 = 84$

☐

$n \times 7 = 84$

☐

12. A plane arrived in Hobart at 1:20pm after $3\frac{3}{4}$ hour flight from Brisbane. What time did it leave Brisbane?

13. Jade buys a 500 gram bag of beads at a market. Each bead has a mass of 0.48 grams. Which is the best estimate for the number of beads in the 500 gram bag?

100

☐

250

☐

1000

☐

2500

☐

14. The graph of $y = 2x - 5$ will be drawn on the grid below. Which two points will the straight line pass through?

15. The height (h metres) and age (a years) of a tree are related by the following inequality:

$$h < 4a - 3 \text{ for values of } a \text{ between 1 and 10}$$

Which pair of values satisfy this inequality?

$h = 2$ and $a = 1$

☐

$h = 6$ and $a = 2$

☐

$h = 10$ and $a = 3$

☐

$h = 20$ and $a = 6$

☐

16. If $k = -3$, what is the value of $k^2 - 4k$?
