

Interpreting data

Teacher resource

Question 1

A resort manager noted the continents from which guests had travelled. The data was used to draw this graph.

About a third of the guests came from which continent?

- ☐ Africa
- ☐ Asia
- ☐ Australia
- ☐ Europe
- ☐ Other

Answer: C

Skill: Students read a pie graph.

Additional questions

1. Estimate the percentage of guests who come from Asia.
2. Explain how the size of the angle at the centre of a sector of the graph can be used to accurately determine this percentage.

Question 2

The weights in kilograms of the 25 students in a Year 8 class were recorded in the stem and leaf plot below.

8	01124
7	2346
6	345
5	0446
4	012358
3	679

What is the difference in weight between the heaviest and the lightest student?

_____ kg

Answer: 48 kg

Skill: Students interpret a stem and leaf plot.

Additional questions

1. What is the median weight of the students?
2. What is the mean weight of the students?

Question 3

People were asked if they own a DVD player, an MP3 player or both.
The results are shown in the table below.

	DVD player	No DVD player
MP3 player	48	52
No MP3 player	12	60

What percentage of people, who own a DVD player, also own an MP3 player?

12%

☐

25%

☐

48%

☐

80%

☐

Answer: D

Skill: Students read a two-way table

Additional questions

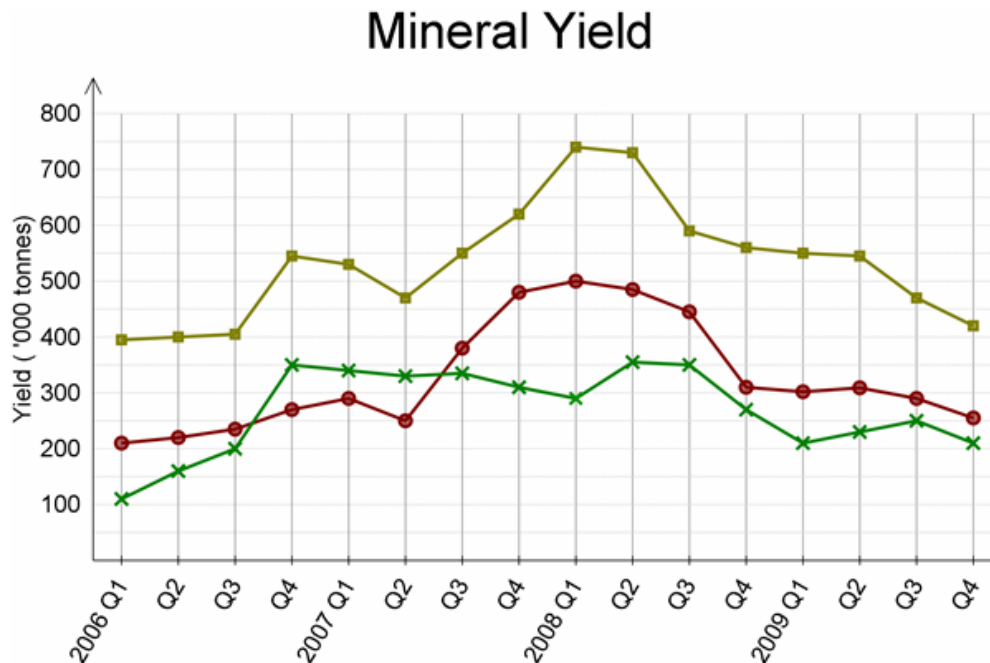

1. What percentage of those interviewed has an MP3 player?
2. What percentage of those who do not has a DVD player have an MP3 player?

Question 4

A graph was constructed to show the numbers of tonnes of minerals mined in a country for each quarter from 2006 to 2009.

The following key was used.

- iron ore
- uranium
- ×— gold

For several quarters, the yield of gold was greater than the yield of uranium. In one of those quarters, the iron ore yield dropped below 500 000 tonnes. Which quarter was this?

- ☐ 2006 Q3
- ☐ 2007 Q1
- ☐ 2007 Q2
- ☐ 2007 Q3

Answer: 2007 Q2

Skill: Students interpret a line graph.

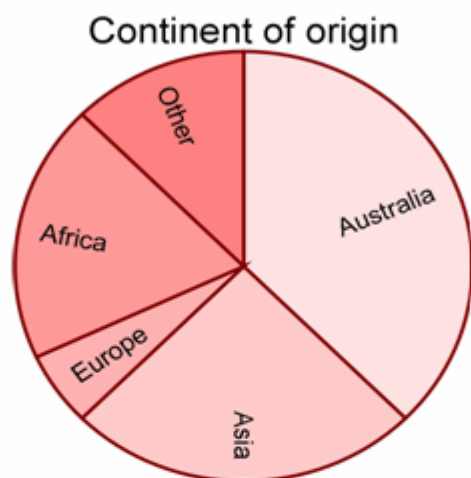

Additional questions

1. In which quarter was the difference in yield between iron ore and uranium the greatest?
2. In which quarter was the difference in yield between iron ore and gold the least?

Student activity: Interpreting data

Question 1

A resort manager noted the continents from which guests had travelled. The data was used to draw this graph.

About a third of the guests came from which continent?

☐	Africa
☐	Asia
☐	Australia
