

Using grids, coordinates and scales to interpret maps

Teacher resource

Question 1

The distance from the Shire Hall to the Fire Station is closest to:

- ☐ 0.004 km
- ☐ 0.04 km
- ☐ 0.4 km
- ☐ 4.00 km

Answer: C

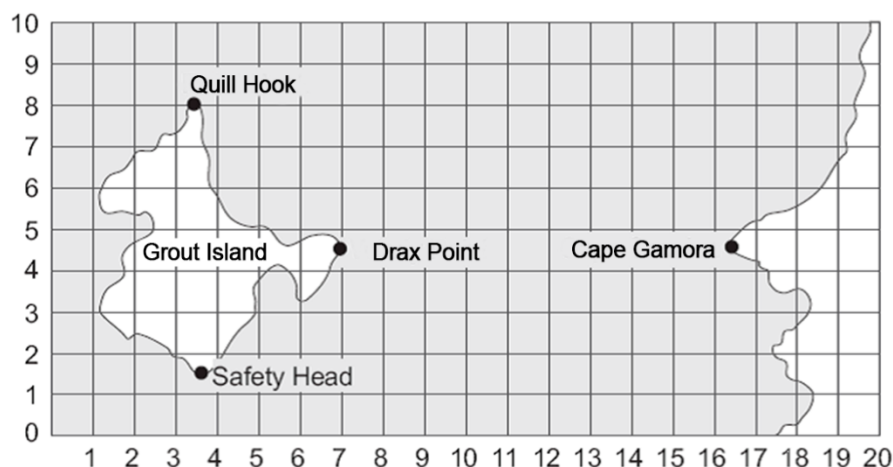

Skill: Students apply knowledge of a simple scale and metric units.

Additional questions

1. What is the distance, in kilometres, from the Shire Hall to the library?
2. What is the approximate area of the block, bordered by Hill St, Darlot St, Roberts St and Porter St, on which the Shire Hall is situated?

Question 2

Below is a map of Grout Island. The actual distance between Drax Point and Cape Gamora is 9.4 kilometres.

The distance on the map between points (8, 1) and (9, 1) is one centimetre.

The scale on the map is closest to:

- ☐ 1:1
- ☐ 1:9.4
- ☐ 1:9400
- ☐ 1:100 000

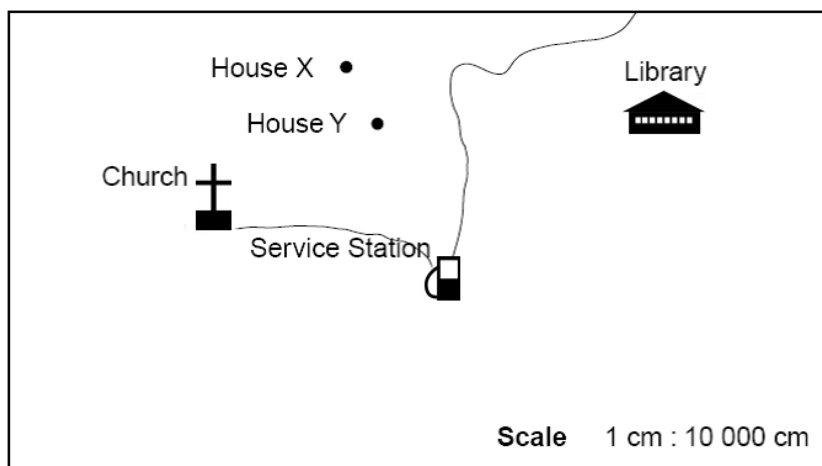

Answer: D

Skill: Students apply knowledge of grid coordinates and scale.

Additional questions

1. What are the coordinates of Drax Point?
2. What is the approximate distance from Safety Head to Drax Point?
3. Drax Point is west of Cape Gamora.
Mark a point that is 500 metres east and 2 kilometres north of Cape Gamora.

Question 3

If the distance on the map between House X and House Y is 1 cm then, using the scale, the actual distance between the two houses is closest to:

- ☐ 0.001 km
- ☐ 0.01 km
- ☐ 0.1 km
- ☐ 1.0 km

Answer: C

Skill: Students use a simple scale.

Additional questions

- How would the answer change if the scale was 1: 20 000?
- If the actual distance between the library and church was 550 metres, how far apart would they be on the map?

Question 4

Two buildings are 0.8 kilometres apart.
The scale used on a map that shows the two buildings is 1:20 000.
The distance between the houses on this map is:

- | | | | |
|-----------------------|-----------------------|-----------------------|-----------------------|
| 4 mm | 16 mm | 40 mm | 160 mm |
| ☐ | ☐ | ☐ | ☐ |

Answer: C

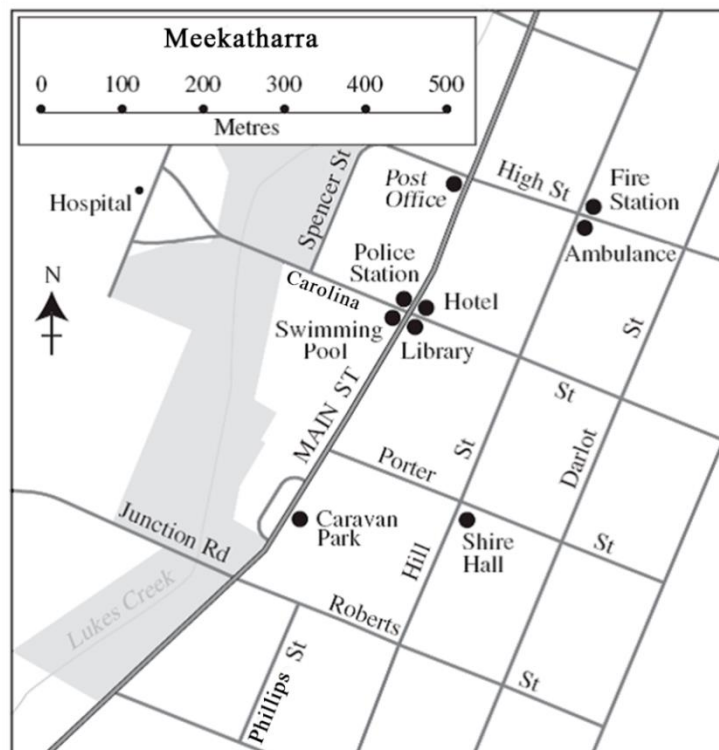

Skill: Students use knowledge of scale and metric units.

Additional questions

- How would the answer change if the scale was 1: 80 000?
- How would the answer change if the scale was 1: 2 000?

Student activity: using grids, coordinates and scales to interpret maps

Question 1

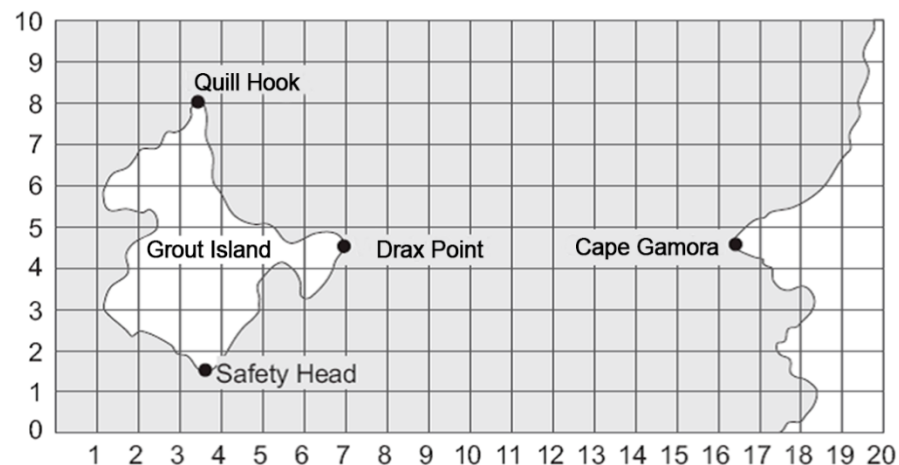

The distance from the Shire Hall to the Fire Station is closest to:

- ☐ 0.004 km
- ☐ 0.04 km
- ☐ 0.4 km
- ☐ 4.00 km

Question 2

Below is a map of Grout Island. The actual distance between Drax Point and Cape Gamora is 9.4 kilometres.

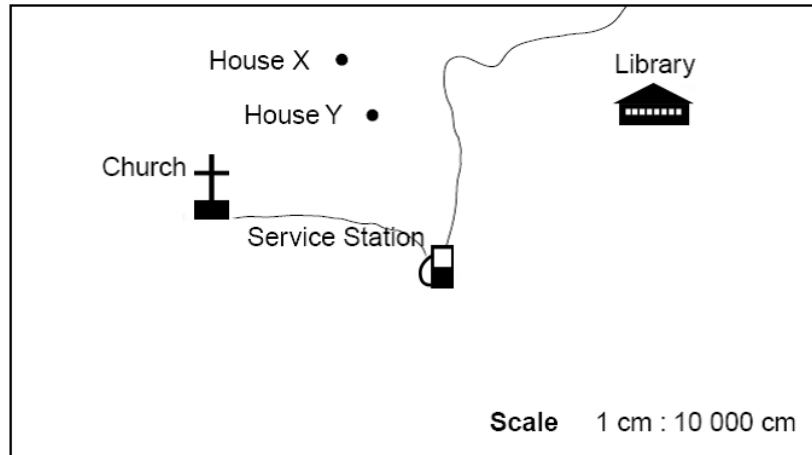

The distance on the map between points (8, 1) and (9, 1) is 1 centimetre.

The scale on the map is closest to:

- ☐ 1: 1
- ☐ 1: 9.4
- ☐ 1: 9400
- ☐ 1: 100 000

Question 3

If the distance on the map between House X and House Y is 1 cm then, using the scale, the actual distance between the two houses is closest to:

- ☐ 0.001 km
- ☐ 0.01 km
- ☐ 0.1 km
- ☐ 1.0 km

Question 4

Two buildings are 0.8 kilometres apart.

The scale used on a map that shows the two buildings is 1:20 000.

The distance between the houses on this map is:

- ☐ 4 mm
- ☐ 16 mm
- ☐ 40 mm
- ☐ 160 mm
