Preface.

This text targets Unit Four of the West Australian course *Mathematics Applications* a course that is organised into four units altogether, the first two for year eleven and the last two for year twelve.

UNIT
ONE

UNIT
TWO

UNIT
THREE

UNIT
FOUR

This West Australian course, *Mathematics Applications*, is based on the Australian National Curriculum Senior Secondary course *General Mathematics*. At the time of writing there are only small differences between the Unit Four content of these two courses, the main difference being that specific examples mentioned in the National syllabus are moved to the glossary of the West Australian syllabus, or removed. Hence this text is also suitable for anyone following Unit Four of the National Curriculum course, *General Mathematics*.

The book contains text, examples and exercises containing many carefully graded questions. A student who studies the appropriate text and relevant examples should make good progress with the exercise that follows.

The book commences with a section entitled *Preliminary work*. This section briefly outlines work of particular relevance to this unit that students should either already have some familiarity with from the mathematics studied in earlier years, or for which the brief outline included in the section may be sufficient to bring the understanding of the concept up to the necessary level.

As students progress through the book they will encounter questions involving this preliminary work in the *Miscellaneous Exercises* that feature at the end of each chapter. These miscellaneous exercises also include questions involving work from preceding chapters to encourage the continual revision needed throughout the unit.

Some chapters commence with, or contain, a "Situation" or two for students to consider, either individually or as a group. In this way students are encouraged to think and discuss a situation, which they are able to tackle using their existing knowledge, but which acts as a fore-runner and stimulus for the ideas that follow. Students should be encouraged to discuss their solutions and answers to these situations and perhaps to present their method of solution to others. For this reason answers to these situations are generally not included in the book.

At times in this series of books I have found it appropriate to go a little beyond the content as specified in the syllabus for the unit involved. In this regard readers will find that in this book I briefly revise simple interest before proceeding to compound interest and, on the basis that centred moving averages might be assumed content under the general inclusion of moving averages, I include mention of this idea. (However if one considers a centred moving average as a weighted average then the glossary for the course, at the time of writing this text, says that weighted moving averages are beyond the requirements for the unit.) I leave it up to the readers and teachers to decide whether to cover these aspects or not.

Alan Sadler

Contents

Preliminary work.	Page 7
Number.	7
Percentages.	7
Straight line graphs.	8
Solving equations.	9
Simple and compound interest.	10
Recursion.	10
Graphs or networks.	11
Bivariate data.	13
Regression.	14
Use of technology.	16
The statistical investigation process.	18
Algorithms.	18
1. Time series data.	Page 19
Time series data.	21
Making predictions.	22
Miscellaneous Exercise One.	32
2. Moving averages and seasonal effects.	Page 33
Making underlying trends more apparent.	34
Moving averages.	35
General smoothing of time series data.	40
Use of spreadsheets.	41
Centred moving averages.	42
Quantifying the seasonal effect.	47
Deseasonalising, or seasonally adjusting, the data.	53
Making predictions.	54
Miscellaneous Exercise Two.	62
3. Finance I: Saving and borrowing.	Page 65
Revision of simple interest, compound interest and recursive rules.	65
Effective annual interest rate.	70
Initial deposit plus regular investments.	72
Compounding isn't only about investing.	76
Loans with regular repayments.	77
What price house can these people afford?	82
Miscellaneous Exercise Three.	84

4. Finance II. Drawing down the investment.	Page 87
Superannuation.	87
Annuities.	89
Indexing.	90
Perpetuities.	91
Suppose the frequency of payments $\neq$ the frequency of compounding.	94
Miscellaneous Exercise Four.	99
5. Minimum spanning trees.	Page 101
Spanning trees.	101
Minimum spanning trees – a systematic approach.	102
Minimum spanning tree from the distances table.	107
Miscellaneous Exercise Five.	113
6. Maximum flow.	Page 115
Maximum flow – a systematic approach.	116
Maximum flow = minimum cut.	121
Miscellaneous Exercise Six.	123
7. Project networks.	Page 125
Project networks.	126
Constructing a project network.	133
Miscellaneous Exercise Seven.	140
8. Assignment problems.	Page 143
Assignment problems.	144
Allocating for a maximum.	145
Four machines, four tasks.	146
An algorithm for solving allocation problems.	148
Suppose we want a maximum.	153
Suppose the number of people $\neq$ the number of tasks.	159
Miscellaneous Exercise Eight.	165
Answers	173
Index	201

Important note.

This series of texts has been written based on my interpretation of the appropriate *Mathematics Applications* syllabus documents as they stand at the time of writing. It is likely that as time progresses some points of interpretation will become clarified and perhaps even some changes could be made to the original syllabus. I urge teachers of the *Mathematics Applications* course, and students following the course, to check with the appropriate curriculum authority to make themselves aware of the latest version of the syllabus current at the time they are studying the course.

Acknowledgements.

As with all of my previous books I am again indebted to my wife, Rosemary, for her assistance, encouragement and help at every stage.

To my three beautiful daughters, Rosalyn, Jennifer and Donelle, thank you for the continued understanding you show when I am "still doing sums" and for the love and belief you show.

I thank my good friend and ex-colleague Theo Wieman for his much appreciated wise counsel.

To the delightfully supportive team at Cengage – I thank you all.

Alan Sadler
