

Design

WACE written examination—2010 design brief

Stage 3

The Design examination comprises a written examination worth 50% of the total examination score and an external validation examination portfolio worth 50% of the total examination score.

Time allowed

Reading time before commencing work: ten minutes

Working time for paper: two hours and thirty minutes

Permissible items

Standard items: pens, pencils, eraser, correction fluid, highlighter

Special items: non-programmable calculators; approved drawing instruments consisting of coloured pencils, drawing compass, set square, dividers, protractor; templates, an extract of work from the examination portfolio (details to be advised).

Additional information

The written examination will be presented in a combined question/answer booklet.

Section	Supporting information
Section One Short Answer 25% of the written exam Five questions in each context Suggested working time: 30 minutes	Candidates are required to answer questions from one of the following contexts: Photography; Graphic; Technical Graphics; Dimensional. Questions provide the opportunity for candidates to create design briefs and/or evaluation criteria based on the experience of self, others and society in general. Candidates are to justify design improvements and present alternative solutions to scenarios based on a design situation and/or briefs based on human problems. Stimulus materials used include a range of primary and secondary sources of design forms relevant to each context. Questions are appropriately scaffolded.
Section Two Extended answer 75% of the written exam Three questions: • One question common to all contexts • Two questions to be answered in selected context Suggested working time: 120 minutes	Candidates answer one question common to all contexts. This question requires candidates to have knowledge of their examined portfolio. Candidates are asked to draw upon examples from their own externally examined portfolio as stimulus material. Candidates answer two questions in one of the following contexts: Photography; Graphic; Technical Graphics; Dimensional. Candidates are presented a common scenario design situation and a design brief that could accommodate a variety of contexts. Stimulus materials used draw upon a range of primary and secondary sources that use quantitative and/or qualitative data such as research data, case studies, survey results, written texts, pictorial representations of products and diagrams of material properties.
