

MARKING KEY

DRAFT

SECTION ONE—MULTIPLE CHOICE

[20 marks]

Question	Mark	Answer
1	1	B
2	1	A
3	1	B
4	1	D
5	1	D
6	1	C
7	1	C
8	1	D
9	1	A
10	1	C
11	1	B
12	1	A
13	1	D
14	1	B
15	1	D
16	1	D
17	1	A
18	1	A
19	1	B
20	1	A

SECTION TWO—SHORT RESPONSE

[60 marks]

Question 1

Describe three (3) advantages and three (3) disadvantages of using a GPS (global positioning system) to navigate on an expedition.

[6 marks]

Marks	Description
6	Correctly names and describes at least three (3) advantages and three (3) disadvantages of using a GPS to navigate from the list below.
4–5	Correctly names and describes at least two (2) to three (3) advantages and two (2) to three (3) disadvantages of using a GPS to navigate from the list below.
2–3	Correctly names and describes at least one (1) advantage and at least one (1) disadvantage of using a GPS to navigate from the list below.
0–1	Shows little or limited understanding of requirements.

Students may select from any of the following:

Advantages:

- accuracy in navigation
- able to create an accurate recording of the route
- increased confidence in knowing present location
- calculates height
- calculates distance

Disadvantages:

- contributes to laziness
- batteries can run out
- it can malfunction
- expensive
- hard to use when sky is blocked.

Question 2

Identify, describe and give examples of three (3) ways that advances in technology have changed outdoor experiences.

[6 marks]

Marks	Description
6	Correctly identifies, describes and gives examples of three (3) ways advances in technology have changed outdoor experiences.
4–5	Correctly identifies, describes and gives examples of at least two (2) ways advances in technology have changed outdoor experiences.
2–3	Identifies, describes and gives examples of at least one (1) way advances in technology have changed outdoor experiences.
0–1	Provides limited description without examples.

Students may choose to discuss any of the following:

- advances in clothing have provided us with greater protection from the environment so we are able to function effectively in a greater range of temperatures while still able to maintain personal comfort
- advances in expeditioning equipment (e.g. lightweight tents, water treatment, sleeping bags) have allowed us to improve the quality of our outdoor experiences
- advances in navigation equipment e.g. GPS
- advances in emergency response equipment e.g. E.P.I.R.B s, thermal blankets, blow up splints
- advances in mode of travel equipment e.g. mountain bikes, hiking shoes, kayaks.

Question 3

Discuss three interpretative activities you could use to educate others about a part of a local natural environment.

[6 marks]

Marks	Description
6	Correctly discusses three interpretative activities that could be used to educate others.
4–5	Correctly discusses at least two interpretative activities that could be used to educate others.
2–3	Correctly discusses at least one interpretative activity that could be used to educate others.
0–1	Shows limited evidence of understanding of requirements.

Students may choose to discuss any of the following:

- guided walk
- treasure hunt
- constructing an exhibit
- bird watching
- using field guides
- insect photos
- conducting research
- constructing a plant identification guide.

This list is not exhaustive. The activity must in some way educate others about parts of the environment.

Question 4

Briefly discuss Maslow's hierarchy of needs and describe how it influences decisions made during the planning stage of an expedition.

[6 marks]

Marks	Description
4–6	Correctly names and describes each of the stages in Maslow's hierarchy of needs and describes correctly its influence on expedition planning.
2–3	Correctly names and describes some of the levels in Maslow's hierarchy of needs without correct influence on decisions made mentioned.
0–1	Shows limited evidence of understanding of hierarchy.

Maslow hierarchies of needs are:

- physiological needs
- safety and physical security needs
- love and belongingness needs
- esteem needs
- self-actualisation.

Discussion should be centred on the importance of satisfying the needs on the lower levels of the hierarchy first before any advances upwards can be achieved. An expedition program needs to facilitate the basic needs to be met first. As one's more basic needs are met, one's higher needs can be pursued.

Question 5

Use the diagram above to explain misadventure. Outline what considerations should be addressed in order to avoid misadventure during an outdoor experience.

[6 marks]

Marks	Description
6	Correctly defines misadventure with reference to the diagram and describes in detail five (5) of the considerations listed below.
4–5	Correctly defines misadventure with reference to the diagram and describes at least three (3) of the considerations listed below.
2–3	Correctly defines misadventure with or without reference to the diagram and describes at least one (1) or none of the considerations listed below.
0–1	Shows little or limited understanding of requirements.

Students' answers may contain the following:

Misadventure can be characterised by a person choosing or being forced to participate in challenges beyond his/her capabilities, resulting in negative emotions (fear, hurt etc.), possible injury and even ultimately death.

Considerations to be discussed include:

- program goals
- program location
- activities that make up the program
- age level of the participants
- experience level
- level of skill
- terrain
- weather conditions
- equipment.

Question 6

Equipment is a vital part of all outdoor experiences. It is important that equipment is used, maintained and stored correctly. Select a category of equipment (expedition or a specific outdoor activity). For each item, describe its use, care, maintenance and storage.

[6 marks]

Marks	Description
6	Describes all equipment from chosen category in detail (may include diagrams), clearly describes its recommended use, required maintenance and storage.
4–5	Describes most equipment from the chosen category, adequately describes its recommended use, required maintenance and storage.
2–3	Names some equipment from chosen category, some information on its recommended use and/or required maintenance and/or storage.
0–1	Shows little or limited understanding of requirements.

Question 7

Identify and describe the process that is depicted in the diagram above. Discuss its relevance to outdoor education.

[6 marks]

Marks	Description
6	Correctly identifies the process as experiential learning and describes the process with clarity and detail. Discusses in detail its relevance to outdoor education.
4–5	Correctly identifies the process as experiential learning and describes the process with some detail. Discusses briefly its relevance to outdoor education.
2–3	Correctly identifies the process as experiential learning and describes the process.
0–1	Shows little or limited understanding of requirements.

Question 8

Many outdoor leaders use a checklist or acronyms as part of their briefing prior to an activity commencing. This strategy is an example of which of the three leadership styles listed below? Justify why you made this choice.

- Autocratic
- Democratic
- Abdicratic

Explain why this style of leadership would be best used at this stage of the activity.

[6 marks]

Marks	Description
6	Correctly identifies the style of leadership as autocratic and clearly justifies. Shows a clear understanding of group development. Identifies the stage of group development. Clearly explains why this style of leadership would be most suitable to use during the this stage of the activity.
4–5	Correctly identifies the style of leadership as autocratic and gives some justification. Shows an understanding of group development. Explains why this style of leadership would be most suitable to use during the beginning of an activity.
2–3	Correctly identifies the style of leadership as autocratic. Explains why this style of leadership would be most suitable to use during the beginning of an activity.
0–1	Shows little or limited understanding of requirements.

Question 9

Describe the win-win method of conflict resolution. Discuss the advantages and disadvantages of this method.

[6 marks]

Marks	Description
6	Comprehensive description of the win-win method shows a very clear and detailed understanding. Discusses at least two (2) advantages and two (2) disadvantages clearly.
4–5	Adequate description of the win-win method showing some understanding. Discusses at least one advantage and one disadvantage.
2–3	Some description of the win-win method showing a basic understanding. May have discussed an advantage or a disadvantage.
0–1	Shows little or limited understanding of requirements.

Question 10

Discuss the importance of debriefing and its place in the experiential learning cycle.

- **Describe the stages of a debrief.**
- **Give examples of some questions you would use to assist the facilitation of each stage.**

[6 marks]

Marks	Description
6	Clear and correct discussion of the importance of debriefing. Clearly demonstrates an understanding of the importance of debriefing in the experiential learning cycle. Displays an understanding of the experiential learning cycle. Describes the stages of a debrief clearly with detail and suggests at least two (2) questions for each stage.
4–5	Displays some understanding of the importance of debriefing and its place in the experiential learning cycle, correctly describes the stages of a debrief and suggests at least one (1) question for each stage.
2–3	Describes debriefing and identifies each stage.
0–1	Shows little or limited understanding of requirements.

SECTION THREE—EXTENDED RESPONSE

This section has **THREE (3)** questions. **Attempt ALL questions.**
[60 marks]

Question 11

Outdoor programs are designed to have specific foci such as recreational, at-risk, adventure, environmental and therapeutic.

- (a) Describe the focus of a program in which you have participated.
- (b) Describe, with examples, the elements of this program that were designed to assist in the achievement of its focus.
- (c) Using examples, evaluate the effectiveness of the program in achieving its goals and make suggestions as to how it could have been improved.

[20 marks]

Marks	Description
16–20	Describes program foci with clarity and detail giving evidence of personal experience in it. Describes more than two elements of the program which were designed to assist in achieving its intended foci with clarity and detail. Discusses, giving more than two examples, the effectiveness of the program and makes two or more purposeful suggestions for improvement.
10–15	Describes program foci with clarity and some detail giving evidence of personal experience in it. Describes two elements of the program which were designed to assist in achieving its intended foci with some clarity and detail. Discusses, giving two examples, the effectiveness of the program and makes two purposeful suggestions for improvement.
6–10	Describes program foci and may give evidence of personal experience in it. Describes briefly one element of the program which was designed to assist in achieving its intended foci. Discusses, giving one example, the effectiveness of the program and makes one purposeful suggestion for improvement.
2–5	Describes program foci and may give evidence of personal experience in it. May describes briefly one element of the program which was designed to assist in achieving its intended foci. May discuss effectiveness of the program and may make one purposeful suggestion for improvement.
0–1	Shows little or limited understanding of requirements.

Question 12

'In order to learn from experience we must take the time to sort out the relevant from the irrelevant and the useful from the useless.'

Knapp 1993

- (a) With respect to the quote above, explain the role of a facilitator in the process of helping someone to learn from an outdoor experience.**
- (b) Describe the stages of a debrief. Give examples of questions a facilitator may ask in each of the stages**
- (c) Describe one of your outdoor experiences as a facilitator of a debriefing session. Comment on your performance and the success of the debrief and indicate how you might improve debriefing sessions that you may conduct in the future.**

[20 marks]

Marks	Description
16–20	A clear and detailed explanation of the importance of a facilitator being able to identify possible actions or what is said, considering what is relevant to focus reflection upon in order to promote learning. It is only the relevant that is worth engaging in. Clearly describes the stages of a debrief, the what, so what and now what, giving at least two examples of questions appropriate to assist in the facilitation of each stage. Clearly describes one experience as a facilitator, with detail, making comments on their performance and success of the debrief. Makes two or more suggestions for improvement.
11–15	An explanation of the importance of a facilitator being able to identify possible actions or what is said, considering what is relevant to focus reflection upon in order to promote learning. It is only the relevant that is worth the engaging in. Describes the stages of a debrief with some clarity and detail, the what, so what and now what giving at least one example of a question appropriate to assist in the facilitation of each stage. Describes one experience as a facilitator with some detail making at least one comment on their performance and success of the debrief. Makes at least one suggestion for improvement.
6–10	A brief explanation of the importance of a facilitator being able to identify possible actions or what is said, considering what is relevant to focus reflection upon in order to promote learning. It is only the relevant that is worth the engaging in. Briefly describes the stages of a debrief, the what, so what and now what, may give an example of a question appropriate to assist in the facilitation of each stage. Briefly describes one experience as a facilitator, may make a comment on their performance and success of the debrief. May makes at a suggestion for improvement.
2–5	Attempts to explain the importance of a facilitator being able to identify possible actions or what is said, considering what is relevant to focus reflection upon in order to promote learning. It is only the relevant that is worth the engaging in. May name the stages of a debrief, the what, so what and now what. May briefly describes one experience as a facilitator, may make a comment on their performance and success of the debrief. May makes at a suggestion for improvement.
0–1	Shows little or limited understanding of requirements.

Stages of a debrief are: the what, the so what and the now what.

Examples of questions:

The what: questions should focus on facilitating reflection of the experience.

The so what: questions should focus on identification of the learning from the experience.

The now what: questions should focus on the transference of the learning to other situations.

Question 13

Describe your experiences in nature while on expedition this year that have affected your relationship with nature. Outline how these experiences have affected this relationship. Discuss the importance of a positive human-nature relationship in achieving ecological sustainability.

[20 marks]

Marks	Description
16–20	Displays a very clear understanding of the concept of human relationship with nature through description of their current relationship with nature. A clear and detailed description of three experiences on expedition this year and how they affected their relationship with nature. Clearly describes the relationship between human-nature relationship and ecological sustainability and discusses its importance in detail.
11–15	Displays a clear understanding of the concept of human relationship with nature through description of their current relationship with nature. A clear description of at least two experiences on expedition this year and how they affected their relationship with nature. Clearly describes the relationship between human-nature relationship and ecological sustainability and discusses its importance.
6–10	Displays some understanding of the concept of human relationship with nature through description of their current relationship with nature. A brief description of at least one experience on expedition this year and how they affected their relationship with nature. Attempts to describe the relationship between human-nature relationship and ecological sustainability and discusses its importance.
2–5	May display some understanding of the concept of human relationship with nature through description of their current relationship with nature. May briefly describe one experience on expedition this year and how it affected their relationship with nature. May attempt to describe the relationship between human-nature relationship and ecological sustainability.
0–1	Shows little or limited understanding of requirements.
