

**Western Australian Certificate of Education
Examination, 2009**

Question/answer booklet

**OUTDOOR
EDUCATION**

**Written paper
Stage 2**

Please place your student identification label in this box

Student Number: In figures

--	--	--	--	--	--	--	--

In words

Time allowed for this paper

Reading time before commencing work: ten minutes
Working time for paper: three hours

Materials required/recommended for this paper

To be provided by the supervisor

Multiple-Choice Answer Sheet

This Question/Answer Booklet

Map insert (inside the front cover of this Question/Answer Booklet)

To be provided by the candidate

Standard items: pens, pencils, eraser, correction fluid, ruler, highlighters

Special items: compass

Important note to candidates

No other items may be taken into the examination room. It is **your** responsibility to ensure that you do not have any unauthorised notes or other items of a non-personal nature in the examination room. If you have any unauthorised material with you, hand it to the supervisor **before** reading any further.

Structure of this paper

Section	Number of questions available	Number of questions to be attempted	Suggested working time (minutes)	Marks available	Percentage of exam
Section One: Multiple-Choice	20	20	30	20	20
Section Two: Short Answer	10	10	90	105	50
Section Three: Extended Answer	3	2	60	40	30
Total				165	100

Instructions to candidates

1. The rules for the conduct of Western Australian external examinations are detailed in the *Year 12 Information Handbook 2009*. Sitting this examination implies that you agree to abide by these rules.
2. For Section One you are provided with a multiple-choice answer sheet. Use a blue or black pen or a B or 2B pencil for all entries on this sheet. For each question, shade the box which indicates your answer.
3. For Sections Two and Three, write your answers in the spaces provided in this Question/Answer booklet. A blue or black pen should be used. Wherever appropriate, fully labelled diagrams, tables and examples should be used to illustrate and support your answers.
4. You must be careful to confine your responses to the specific questions asked and to follow any instructions that are specific to a particular question.
5. Spare answer pages are provided at the end of this booklet. If you need to use them, indicate in the original answer space where the answer is continued, i.e. give the page number.

This page has been left blank intentionally

See next page

Section One: Multiple-Choice**20 Marks**

A multiple-choice answer sheet is provided for you to answer questions in this section. Use a blue or black pen or a B or 2B pencil.

This section has **twenty (20)** questions. Attempt **all** questions.

Suggested working time: 30 minutes

1. A **log book** can best be described as
 - (a) a fictional account of the events from an expedition.
 - (b) a manual used for preparation for an expedition.
 - (c) an accurate record of events from an expedition.
 - (d) a record of personal reflection on performance during an expedition.

2. Moderate hypothermia occurs when the body's core temperature reaches
 - (a) 40°C.
 - (b) 37°C.
 - (c) 32°C.
 - (d) 35°C.

3. Which of the following are all signs of hyperthermia?
 - (a) profuse sweating, red skin and dilated pupils
 - (b) pale/clammy skin, confusion, exhaustion
 - (c) dizziness, increased heart rate, hot/dry skin
 - (d) slurred speech, dilated pupils, irritability

4. Using an 'Attack Point' as a technique in navigation is
 - (a) deliberately aiming for a feature away from the known objective.
 - (b) using a parallel linear feature to arrive at your objective.
 - (c) aiming for an obvious feature near to a control or check point.
 - (d) deliberately aiming at a distance away from an objective on a linear feature.

5. Which of the following are all qualities of a good knot?
 - (a) low effect on rope strength, easy to determine rope damage
 - (b) easily tied, low effect on rope strength
 - (c) easy to undo, easily adjusted
 - (d) look symmetrical, good shape

6. Principles of Risk Management include
 - (a) identification, assessment, reduction strategies.
 - (b) types, frequency, weather.
 - (c) identification, weather, reduction strategies.
 - (d) people, environment, equipment.

See next page

7. Which of the following is a technique that could be used to assist in problem solving?
- (a) collaborating
 - (b) debriefing
 - (c) brainstorming
 - (d) front loading
8. When a group leader strives to meet objectives and achieve the best possible results from their group they are known as
- (a) good communicators.
 - (b) task-oriented leaders.
 - (c) consulting leaders.
 - (d) passive leaders.
9. Framing the experience in an adventure activity brief is intended to
- (a) help individuals prepare for the experience.
 - (b) relate the activity to life experiences.
 - (c) give safety points and guidelines.
 - (d) create a snapshot of probable outcomes.
10. Which of the following could be used to self-appraise personal skills?
- (a) group communication questionnaire
 - (b) peer assessment personal skills check list
 - (c) expedition navigation route plan
 - (d) self assessment of personal skills checklist
11. Two ways a person may broaden their open-arena quadrant of a 'Johari Window' include
- (a) talking to the group leader about their fears and focusing on the group goals.
 - (b) motivating themselves and volunteering to be the first participant.
 - (c) being positive at all times and listening to others.
 - (d) disclosing information about themselves to others and receiving feedback from others.
12. Which process below represents the 'So What' phase of debriefing?
- (a) adapting experience to other life situations
 - (b) each person in the group reflecting on positive aspects
 - (c) reflecting on what was learned by the experience
 - (d) taking photographs to illustrate level of performance

13. Developing clear expectations and ground rules for behaviour of the group is a
- (a) strategy for building effective group relationships.
 - (b) means of appraising personal and group skills.
 - (c) way of eliminating undesirable behaviours.
 - (d) method of evaluating group leadership performance.
14. Which of the following does **not** support the development of sustainability?
- (a) conserving sites of cultural and historical heritage
 - (b) reducing negative impacts on the quality of air, water and other natural elements
 - (c) using renewable resources within the limits of regeneration and natural growth
 - (d) minimising depletion of non-renewable resources
15. Observations of animal scats and tracks can tell you most accurately about the
- (a) diet of the animal, including both food sources and availability of water.
 - (b) type and size of the animal and its direction and speed of travel.
 - (c) gender of the animal and the number of animals in the environment.
 - (d) health of the animal and the total population of the species.
16. The Tasmanian Overland Track is one of the world's great wilderness bushwalks. As a result, it faces overcrowding and environmental degradation. Management strategies used to address these issues include
- (a) restrictions on the number of side tracks that can be used; increased fees.
 - (b) limit of one night at each camp site; limit of one cooking stove per group of walkers.
 - (c) booking system for walkers; restrictions on the direction of travel during peak period.
 - (d) closing of side tracks during peak periods; booking system for walkers.
17. A high-pressure system centred over southern Western Australia would usually result in which of the following characteristics of weather?
- (a) clear skies, no rain, light to moderate winds
 - (b) cumulonimbus clouds, rain and thunderstorms, moderate winds
 - (c) stratus clouds, no rain, strong winds
 - (d) cirrus clouds, no rain, strong winds
18. In which of the following scenarios are you likely to have the greatest difficulty in practising Leave No Trace principles?
- (a) properly disposing of waste in an arid environment
 - (b) minimising the impact of fire when camping close to a river
 - (c) respecting wildlife when hiking in a national park
 - (d) camping on a durable surface in a coastal dune environment

19. Which of the following would suggest the approach of a cold front?
- (a) cumulus clouds, atmospheric pressure decreasing, strong south-easterly winds
 - (b) altostratus clouds, atmospheric pressure increasing, westerly winds weakening to almost calm conditions
 - (c) development of altostratus and nimbostratus clouds, atmospheric pressure decreasing, strong north-westerly winds
 - (d) cumulonimbus clouds, atmospheric pressure increasing, strengthening southerly winds
20. Which of the following statements about the use of fire as a management strategy in Western Australia's south-west forests is **false**?
- (a) Fire management strategies take into account frequency of fire, season, intensity of fire and size of area burnt.
 - (b) Environmental managers take advantage of deliberately-lit arson fires in their conservation work.
 - (c) Controversy exists in relation to the capacity of plant and animal communities to recover from frequent controlled burns.
 - (d) Environmental managers model their controlled burns on the traditional Aboriginal use of fire.

End of Section One

Section Two: Short Answer

105 Marks

This section has **ten (10)** questions. Attempt **all** questions. Answer in the space provided.

Suggested working time: 90 minutes

Question 1

(9 marks)

Causal factors relating to risk management are represented in the diagram below.

Identify and describe each of the three causal factors represented in the diagram above and give **two (2)** examples of each causal factor from your expedition this year.

Causal factor (i) _____

Description of causal factor (i) (1 mark)

Examples of causal factor (i) (2 marks)

1. _____

2. _____

Causal factor (ii) _____

Description of causal factor (ii) (1 mark)

Examples of causal factor (ii) (2 marks)

1. _____

2. _____

Causal factor (iii) _____

Description of causal factor (iii) (1 mark)

Examples of causal factor (iii) (2 marks)

1. _____

2. _____

Question 2**(16 marks)**

Hypothermia results from a drop in the body's core temperature.

- (a) Using the core temperatures listed below write a detailed list of the signs and symptoms for hypothermia as it increases in severity. (12 marks)

37°C

(2 marks)

35°C

(4 marks)

32°C

(4 marks)

28°C

(2 marks)

- (b) Describe **four (4)** appropriate actions in managing a person who is showing signs of approaching the late/severe stages of hypothermia. (4 marks)

1. _____

2. _____

3. _____

4. _____

Question 3

(11 marks)

- (a) Using the Jorgensen Park Orienteering Map insert, complete all the sections of the route card below. (10 marks)

Travelling from Check Point 3 to Check Point 4

Route Card	Bearing	(1 mark)
	Distance to travel (direct path)	(1 mark)
	Change in altitude	(1 mark)
	Route description (straight line)	(7 marks)

- (b) What significant feature on the map is located approximately 800 m on a bearing of 270 degrees from check point 10? (1 mark)

Question 4

(7 marks)

- (a) Name and describe **two (2)** reflective tools that can be used for self-appraisal of personal skills. (4 marks)

(i)

(ii)

- (b) Give **three (3)** reasons why it is important to self-appraise your personal skills. (3 marks)

1.

2.

3.

Question 5

(4 marks)

Write below each scenario the leadership style adopted by the leader in the example (use each style only once).

- (a) Another group had already camped in the selected campsite. The leader requested input from the group on the problem. The group made recommendations to the leader on the best possible solution to the problem. The leader reviewed the possible solutions and selected one. When the decision was made, all group members were informed. (1 mark)

The leader used the _____ style.

- (b) The leader gave guidelines regarding campfires, cleanliness, noise restrictions and toilet areas, but agreed that everyone had responsibility for their own areas and behaviour. (1 mark)

The leader used the _____ style.

- (c) The weather had deteriorated rapidly and the conditions were getting dangerous. The leader decided on what action she would take and instructed the group what to do. (1 mark)

The leader used the _____ style.

- (d) The group had arrived at an intersection and the leader won the acceptance of the group by using the map and compass to inform them that his decision would save time and was an easier track. (1 mark)

The leader used the _____ style.

Question 6**(12 marks)**

Name and describe **two (2)** outdoor leadership skills for each group of skills below.

(a) Generic skills: (4 marks)

(i)

(ii)

(b) Specific skills: (4 marks)

(i)

(ii)

(c) Metaskills: (4 marks)

(i)

(ii)

See next page

Question 7

(8 marks)

- (a) Describe any **two (2)** stages of group development as identified by Tuckman. (4 marks)

(i)

(ii)

- (b) Provide **four (4)** reasons why a group may not progress from any one stage of group development as identified by Tuckman to another. Ensure that you identify the stages you are progressing from and to for each reason. (4 marks)

1.

2.

3.

4.

Question 8**(15 marks)**

A group has implemented the following minimum-impact practices as part of their expedition best practice.

- (a) Write the Leave No Trace principle that is demonstrated by each of the following minimum-impact practices. (7 marks)

Example of minimum-impact practice	Leave No Trace principle
Wash dishes using biodegradable soap well away from lakes or streams	
Camp away from trails and other visitors and ensure your group is self-sufficient	
Clean boots, expedition equipment and pack after every trip	
Do not feed animals or approach them in their natural habitat	
Walk in single file in the middle of existing trails	
Ensure that all participants pack suitable clothing and carry enough food	
Carry a fuel-burning stove for boiling water and cooking meals	

- (b) Choose **four (4)** Leave No Trace principles and describe a minimum-impact practice you adopted for your expedition this year to support each of those four principles. You may not use examples given as part of question 8 (a). (4 marks)

1. _____

2. _____

3. _____

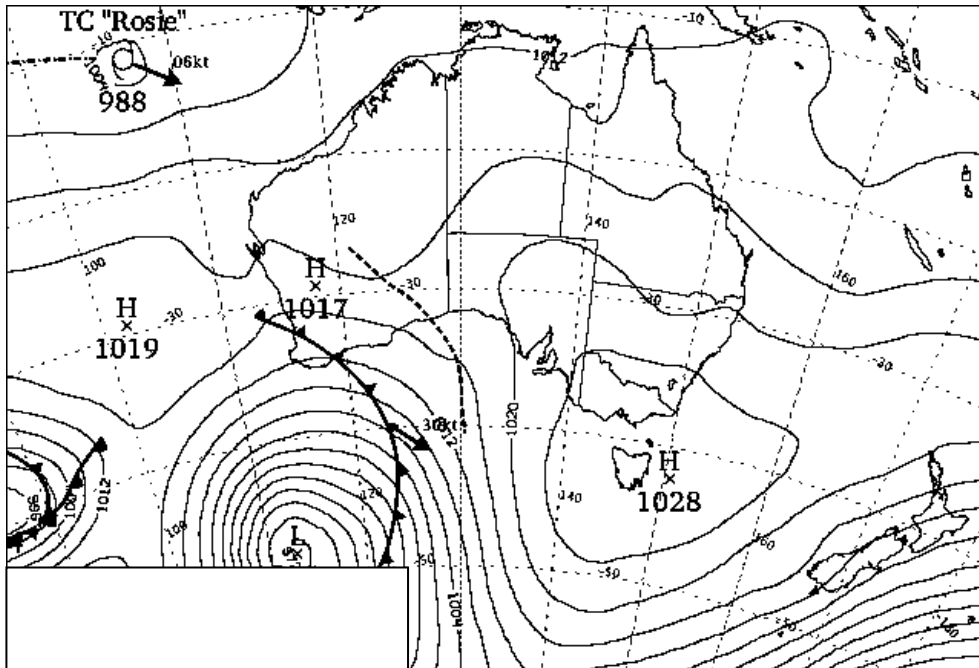

4. _____

- (c) Explain how the natural environment in which you were expeditioning affected your implementation of **two** minimum-impact principles you described in question 8 (b).
(4 marks)

Question 9

(11 marks)

This question relates to the synoptic chart below.

- (a) At what time of year would you expect to see a weather pattern similar to that depicted in the synoptic chart?

- (b) Identify the **five (5)** features represented in the synoptic chart and describe the resultant weather you would expect to experience as a result of those features.

1. Weather feature _____

Typical weather associated _____

2. Weather feature _____

Typical weather associated _____

3. Weather feature _____

Typical weather associated _____

4. Weather feature _____

Typical weather associated _____

5. Weather feature _____

Typical weather associated _____

See next page

Question 10

(12 marks)

Choose a natural environment you have visited or studied that has some historical/cultural/Indigenous heritage values.

- (a) Chosen natural environment: _____ (1 mark)

Describe **three (3)** historical/cultural/Indigenous heritage values of that environment. (3 marks)

- (b) Describe **four (4)** management approaches that have been adopted for conservation of those values. (4 marks)

- (c) Identify and describe **two (2)** issues relating to the conservation of those values for this environment. (4 marks)

End of Section Two

See next page

Section Three: Extended Answer

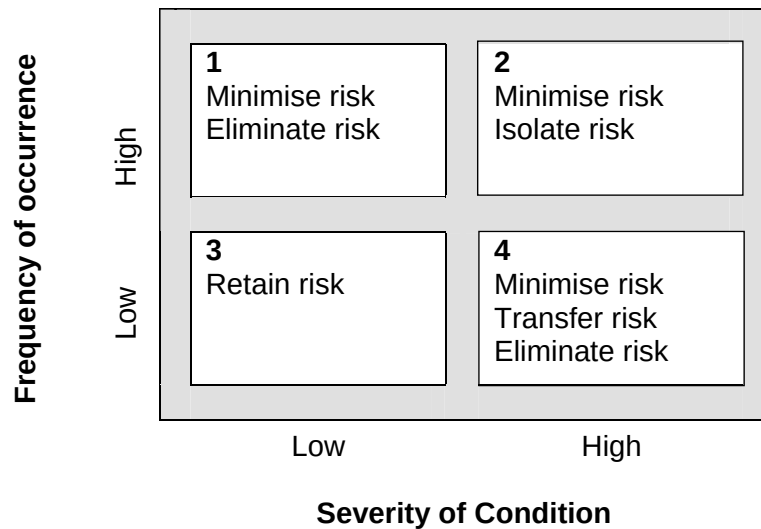

40 Marks

This section has three (3) questions. Attempt **two (2)** of the three questions.

Suggested working time: 60 minutes

Question 1 – Outdoor Experiences**(20 marks)**

The diagram below represents a tool to assist in risk management.

- (a) Give a detailed description of each of the four quadrants represented in the diagram. (8 marks)

[illegible]

(20 marks)

- [illegible]

See next page

- (b) Describe how the use of the expedition logbook/journal and debriefing activities during your expedition assisted in recording and evaluating your own performance within a group. (10 marks)

[illegible]

(20 marks)

- [illegible]

- (b) Describe features from the natural environment of your expedition and how those features affected the planning and preparation for your expedition. (6 marks)

This image shows a full page of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page, providing a template for handwriting practice. There are no margins, text, or other markings on the page.

- (c) How did your expedition experience enhance your relationship with nature? (4 marks)

End of questions

Check that you have written your Student Number on the front cover of this booklet.
