

Week 3 - Lesson 2 - Sine Ratio

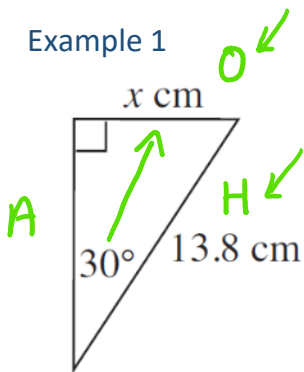

Wednesday, 8 April 2020 10:44 AM

IMPORTANT

Sine ratio: $\sin(\theta) = \frac{\text{opposite}}{\text{hypotenuse}}$

Example 1

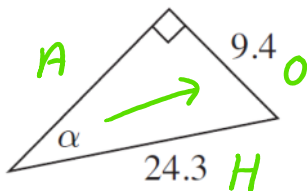

$$\sin \theta = \frac{O}{H}$$

$$13.8 \times \sin 30^\circ = \frac{x}{13.8 \text{ cm}} \times 13.8$$

$$x = 13.8 \times \sin 30^\circ$$

$$x = 6.9 \text{ cm}$$

Example 2

$$\sin \theta = \frac{O}{H}$$

$$\sin \theta = \frac{9.4}{24.3} \quad \Bigg\} = 0.387$$

$$\sin^{-1}(9.4 \div 24.3) \quad \sin^{-1}(0.387)$$

$$\theta = 22.8^\circ$$

$$\theta = 22.8^\circ$$
