MATERIALS NEEDED

Scissors and Stapler

FLIPBOOK INSTRUCTIONS

Cut out pages along solid black lines

Assemble foldable

Staple along top edge

CONTENTS

Pages 3-5 : Foldable

Pages 6-7 : Sample Completed
Foldable Pages

Writing and Graphing Equations in the Form $y = mx + b$

A boat rental company charges \$50 to rent a boat and \$25 for each hour of rental time.

Represent this relationship using a table, equation, & graph.

AS A TABLE

Hours Rented	Total Cost

AS AN EQUATION

AS A GRAPH

Now You Try

Carl has \$360 in his checking account. He spends \$20 per day from the account.

Represent this relationship using a table, equation, & graph.

AS A TABLE

Day	Amount (\$)

AS AN EQUATION

AS A GRAPH

Multiple Representations of Linear Relationships

Page 2 - Goes Behind Cover Page

Jon has a gym membership. He pays a flat fee of \$20 per month and then \$5 each time he attends. Graph a linear relationship between the number of times Jon attends the gym and his monthly cost.

Step 1 - Make a Table

Number of Times Attended	0	1	2	3
Total Monthly Cost				

Step 2 - Use the Table to Create Ordered Pairs and Plot Them on the Graph

Graphing Linear Relationships From a Word Problem

Bottom Page - Stack all pages on top of this one

Example #1

Teri takes a taxi to Target. The taxi driver charges an initial charge of \$3.20 plus \$2.65 per mile. Write the equation that represents this relationship.

Example #2

Fill in the following table so the values satisfy the equation $y=0.5x+8$.

Show Your Work

x	4	8	12	16
y				

Challenge Example

Which equation best represents the relationship between x and y in the graph?

A) $y=-2x+3$

B) $y=3x-2$

C) $y=2x+3$

D) $y=3x+2$

Mixed Examples & More Practice

Tom's Taxi Company charges a flat fee of \$5 and then \$0.75 per mile traveled.

Write an equation to describe this linear relationship.

Now You Try

Paul just filled his new hot tub and it is at a temperature of 104°.

The temperature decreases 2° per hour.

Write an equation to describe this linear relationship.

Writing Equations of Linear Relationships From a Word Problem

Student Instructions

Cut out the 5 pages of the flip book

Stack the pages in the correct order
(see example picture)

Staple or Glue the book together (stapling in preferred)

Answer Key / Sample Pages

Jon has a gym membership. He pays a flat fee of \$20 per month and then \$5 each time he attends. Graph a linear relationship between the number of times Jon attends the gym and his monthly cost.

Step 1 - Make a Table

Number of Times Attended	0	1	2	3
Total Monthly Cost	20	25	30	35

Step 2 - Use the Table to Create Ordered Pairs and Plot Them on the Graph

Graphing Linear Relationships From a Word Problem

Writing Equations of Linear Relationships From a Word Problem

Multiple Representations of Linear Relationships

Mixed Examples & More Practice

Tom's Taxi Company charges a flat fee of \$5 and then \$0.75 per mile traveled. Write an equation to describe this linear relationship.

$$y = 0.75x + 5$$

or

$$y = 5 + 0.75x$$

Now You Try

Paul just filled his new hot tub and it is at a temperature of 104°.

The temperature decreases 2° per hour. Write an equation to describe this linear relationship.

$$y = 104 - 2x$$

or

$$y = -2x + 104$$

Writing Equations of Linear Relationships From a Word Problem

Multiple Representations of Linear Relationships

Mixed Examples & More Practice

Answer Key / Sample Pages

A boat rental company charges \$50 to rent a boat and \$25 for each hour of rental time.

Represent this relationship using a table, equation, & graph.

AS A TABLE

Hours Rented	Total Cost
0	50
1	75
2	100
3	125

AS AN EQUATION

$$y = 25x + 50$$

AS A GRAPH

Now You Try

Carl has \$360 in his checking account. He spends \$20 per day from the account.

Represent this relationship using a table, equation, & graph.

AS A TABLE

Day	Amount (\$)
0	360
1	340
2	320
3	300

AS AN EQUATION

$$y = 360 - 20x$$

AS A GRAPH

Multiple Representations of Linear Relationships

Mixed Examples & More Practice

Example #1

Teri takes a taxi to Target. The taxi driver charges an initial charge of \$3.20 plus \$2.65 per mile. Write the equation that represents this relationship.

$$y = 3.20 + 2.65x$$

or

$$y = 2.65x + 3.20$$

Example #2

Fill in the following table so the values satisfy the equation $y = 0.5x + 8$.

Show Your Work

x	4	8	12	16
y	10	12	14	16

Challenge Example

Which equation best represents the relationship between x and y in the graph?

A) $y = -2x + 3$

B) $y = 3x - 2$

C) $y = 2x + 3$

D) $y = 3x + 2$
