

Activity 5 Maddy's boots

Aim: Develop and use a currency converter spreadsheet.

Maddy is shopping online. She sees these boots that come from the United States.

How much will it cost to buy them?

She needs to "buy" US \$16.58 and then there will be postage or shipping charges as well.

The exchange rate table shows how much of the foreign currency can be bought with A\$1.00.

This activity requires you to build a spreadsheet to convert between currencies.

Exchange rate table Units of foreign currency per A\$ on 20 Dec 2013	
United States dollar	0.8871
Japanese yen	92.67
European euro	0.6506
South Korean won	942.06
Singapore dollar	1.1236
UK pound sterling	0.5422
New Zealand dollar	1.0808
Thai baht	28.88
Malaysian ringgit	2.9128
Indian rupee	55.25
Indonesian rupiah	10867
Vietnamese dong	18722
South African rand	9.2170

1. Build the spreadsheet shown

Step by step instructions are in the Learning notes

Ensure the correct formulas are used in cells C4 and A6.

- Describe what happens when the number in cell A4 is changed.
- Describe what happens when the number in cell C6 is changed.

	A	B	C	D
1	Exchange rate			
2	1 AUD	0.887	Other	
3				
4	350 -->		310.49	
5				
6	81.16 <--		72	
7				
8	Enter the rate in C2			
9	Enter \$AU in A4 or			
10	other currency in C6			
11				
12				
13				
14				
15				
16				
17	72			
18	C6 72			

2. Complete the table using the rates shown above

A\$ (Australian dollars)	Other currency
A\$214	Yen
	75 Euros
A\$23.50	won
A\$1093	Pound sterling
	200 000 Vietnamese dong
A\$75	rupiah

3. Maddy wants to buy a new jacket online. It is advertised at \$45.70 US. How much will it cost in AUD?

4. Repeat Q2 using current rates.

E.g. use <http://www.rba.gov.au/statistics/frequency/exchange-rates.html>

A\$ (Australian dollars)	Other currency
A\$214	Yen
	75 Euros
A\$23.50	won
A\$1093	Pound sterling
	200 000 Vietnamese dong
A\$75	rupiah

5. Challenge: convert \$45.20 US into Malaysian ringgit.

Learning notes:

Detailed instructions to build the spreadsheet

Open spreadsheet

- Tap , tap the Spreadsheet button

Enter values

- Tap in cell A1
- Enter a heading *Exchange rate*
- Tap  to make bold
- Tap in cell A2 and enter *1*
- Tap in cell B2 and enter *AUD*
- Tap in cell C2 and enter *0.8872*
- Tap in cell A4 and enter *350* (or any number you wish)
- Tap in cell B4
 - press , press  twice, select  menu, tap > and press 
- Tap in cell B6, tap <, press  twice and press 
- Tap in cell C6 and enter *72* (or any other number)

	A	B	C	D
1	Exchange rate			
2	1	AUD	0.8872	Other
3				
4	350		310.49	
5				
6	81.16	<--	72	
7				
8	Enter the rate in C2			
9	Enter \$AU in A4 or			
10	other currency in C6			
11				
12				
13				
14				
15				
16				

Enter formulas

- Tap in cell C4 and enter , tap in cell C2, press  tap in cell A4 and press .
- Tap in cell A6 and enter , tap in cell C6, press  tap in cell C2 and press .
- The formula is displayed at the bottom of the screen.
Tap  to view details of cell contents.
Tap on a different cell to see another cell's contents.
- Tap  again to close.

	A	B	C	D
1	Exchange rate			
2	1	AUD	0.8872	Other
3				
4	350		310.49	
5				
6	81.16	<--	72	

=A4*C2

✓ X

✓ C4 Value:
310.485

✓ C4 Formula:
A4*C2

C4 310.485

Enter instructions (optional)

- Tap in cell A8 and enter *Enter the rate in C2.*
- Tap in cell A9 and enter *Enter A\$ in A4 or.*
- Tap in cell A10 and enter *Enter other currency in C6.*
