

Volume vs Capacity

- Volume – the amount of space a solid occupies

- Capacity – the amount a container can hold

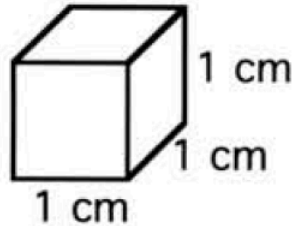

Volume

- Measured in cubic metre (m^3), cubic centimetre (cm^3) etc.

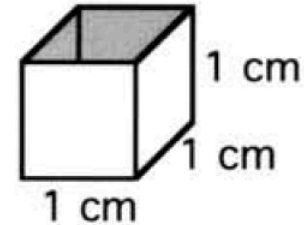

Capacity

- Measured in litres (L), millilitres (mL) etc.

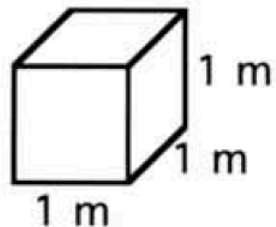

Conversion

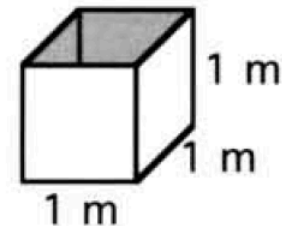

The block shown above has a volume of
1 cubic centimetre (1 cm^3)

The container shown above has a **capacity** of
1 millilitre (1 mL)

The block shown above has a volume of
1 cubic metre (1 m^3)

The container shown above has a **capacity** of
1 kilolitre (1 kL)

$1 \text{ L} = 1000 \text{ mL}$
1 L of liquid occupies 1000 cm^3

$1 \text{ kL} = 1000 \text{ L}$
1 kL of liquid occupies 1 m^3
