

Name: _____

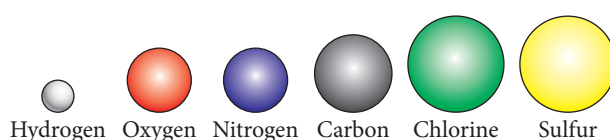

Class: _____

ACTIVITY SHEET

6.3 Determining the shape and polarity of molecules

Complete the written sections of the table, then draw space-filling models using the key.

Key:

Molecule	Formula	Electron dot formula	No. atoms bonded to central atom	No. of lone pairs on central atom	Space-filling model of molecule	Polarity of molecule
Water	H ₂ O					
Hydrochloric acid	HCl					
Sulfur dioxide	SO ₂	$ \begin{array}{c} \ddot{\text{S}}::\ddot{\text{O}} \\ \ddot{\text{O}}: \end{array} $				
Ammonia	NH ₃					

Molecule	Formula	Electron dot formula	No. atoms bonded to central atom	No. of lone pairs on central atom	Space-filling model of molecule	Polarity of molecule
Carbon dioxide	CO ₂					
Sulfur trioxide	SO ₃	<pre> :O: :O:S:O: </pre>				
Dihydrogen sulfide	H ₂ S					
Methane	CH ₄					
Nitrogen dioxide	NO ₂	<pre> N::O O: </pre>
