

1. [10 marks]

(2013:S2:5)

(a) Define 'heredity'.

[1]

(b) Name the theorist most commonly associated with social learning through observation.

[1]

(c) Teachers want parents to increase the time students spend studying rather than watching television. Operant conditioning strategies can be used to increase the amount of time a student spends on study. Complete the following table by describing one positive and one negative example for both reinforcement and punishment that could be used to increase the time spent on study.

[8]

Strategy	Reinforcement	Punishment
Positive		
Negative		

2. [10 marks]

- (a) Give **two** words which describe the basic principles of classical conditioning. [2]

- (b) Pavlov studied the digestive systems of dogs. Salivation is a reflex action that normally occurred before Pavlov fed the dogs. He conducted an experiment after he noticed that the dogs began to salivate at the sound of footsteps. This was done by pairing food powder with a buzzer just before the dogs were fed. After a number of pairings, the buzzer, without food powder, would trigger salivation. This experiment illustrated how learning could occur by modifying a reflex behaviour. Identify the unconditioned stimulus, the unconditioned response, the neutral stimulus, the conditioned stimulus and the conditioned response in this experiment. [5]

Unconditioned stimulus: _____

Unconditioned response: _____

Neutral stimulus: _____

Conditioned stimulus: _____

Conditioned response: _____

- (c) Classical conditioning theory can be applied in the treatment of fears and phobias in humans. Name and describe the behaviour modification technique based on classical conditioning theory used to treat fears and phobias. [3]

3. [6 marks]

(2014:S3:4)

Adam was at a party with friends from school. He was not enjoying himself and was thinking 'I want to go home'.

- (a) Identify one observable behaviour that Adam may be showing. [1]

Suddenly Adam sees Lucy, with whom he lost contact many years ago. As she walks toward him, he remembers her name.

- (b) Identify what type of memory Adam used when he remembered Lucy's name. [1]

Adam and Lucy chat for a while and she says that they should stay in contact. Lucy tells Adam that her telephone number is 0425 456 789. Adam does not have anything to write the phone number down on, so he tries to remember it.

- (c) (i) Describe briefly one problem that Adam might have in trying to remember Lucy's telephone number. Explain the reason why, referring to a feature of short-term memory. [2]

- (ii) Outline two strategies that Adam could use to assist him in remembering Lucy's telephone number. [2]

4. [3 marks]

(2014:S3:9d)

Mrs Costa is referred to a psychologist for cognitive-behavioural therapy because she has been feeling sad and worried. Explain three things that the psychologist could tell Mrs Costa about how cognitive-behavioural therapy might help her.

5. [6 marks]

(2015:S3:5a-d)

- (a) Hayley auditioned for the lead role in the school drama production but was unsuccessful. Hayley thought, 'This means that I will never reach my goal of being an actor'. Name **one** way Hayley might have felt after having this thought. [1]

- (b) Samantha also auditioned for the lead role in the production and was unsuccessful. However, she still felt motivated to focus on her goal of being an actor. Provide an example of a thought that Samantha might have had when she found out that she was unsuccessful in her audition. [1]

- (c) The basic principles underlying cognitive behavioural therapy can be represented as follows.

Event → Thoughts → Feelings → Behaviours

Referring to these basic principles, explain how cognitive behavioural therapy can be used to help people to modify their negative feelings and behaviours. [2]

- (d) Outline **two** strategies that are used in cognitive behavioural therapy to help clients modify negative thoughts. [2]

One: _____

Two: _____

6. [16 marks]

(2016:ATAR:5)

- (a) Mrs Jackson gives her students a stamp every time they are well behaved. Once 20 stamps are collected, students may choose a reward from the prize box. Name the technique used for modifying the students' behaviour. [1]

Monica's cat comes running into the house as soon as Monica opens the refrigerator to prepare its food.

- (b) (i) Name the type of learning that this involves. [1]

- (ii) State **two** reasons for your answer to part (b)(i). [2]

One: _____

Two: _____

(c) Define these terms in relation to learning theory.

(i) reinforcement

[1]

(ii) punishment

[1]

(d) Andrew wants his son Jimmy to clean up his room. Give **one** example of how he might achieve this using

(i) positive reinforcement.

[1]

(ii) negative reinforcement.

[1]

(e) Andrew also wants Jimmy to stop swearing. Give **one** example of how he might achieve this using

(i) positive reinforcement.

[1]

(ii) negative reinforcement.

[1]

Violet experienced severe nausea and vomiting from eating contaminated food from a market. The market was decorated with coloured lanterns. Violet now feels sick every time she sees coloured lanterns.

- (f) (i) The process of learning in Violet's experience is shown below. The unconditioned response is nausea/vomiting. Identify the remaining variables. [4]

Neutral stimulus	+	Unconditioned stimulus	→	Unconditioned response
_____		_____		Nausea/vomiting
_____		_____		
		Conditioned stimulus	→	Conditioned response
		_____		_____
		_____		_____

In Pavlov's original experiments, the conditioned response was produced after multiple pairings of the neutral stimulus and unconditioned stimulus. However, Violet learned the association with a single pairing.

- (ii) Outline what learning theorists believe about why some associations are learned very quickly. [2]

7. [16 marks]

(2017:ATAR:6)

Caleb went to see a psychologist for help to overcome his fear of birds. Caleb told the psychologist that he was afraid of all birds because when he was young a magpie swooped down on his head and pecked him. He now avoided all birds because he believed that they would hurt him.

- (a) (i) Outline **four** steps that the psychologist would use in applying systematic desensitisation to help Caleb overcome his fear of birds. [4]

One: _____

Two: _____

Three: _____

Four: _____

- (ii) The psychologist could also use Cognitive Behavioural Therapy (CBT) to help Caleb change his negative beliefs about birds. A and B are both examples of positive beliefs about birds.

A. Birds will not hurt me.

B. Birds that are in cages will not hurt me.

Identify which belief would be appropriate to promote through CBT and state a reason for your response. [2]

Figure 1 below is a diagram of the multi-store model of memory, with particular stages labelled A to E.

Figure 1. Multi-store model of memory

- (b) (i) Name the part of memory labelled C. [1]

- (ii) On Tuesday, Jeremy noticed that Emily, wore a pink ribbon brooch. On Friday he asked her about the brooch as a way to connect with her. State how it is evident that Jeremy had encoded information into C. [1]

CONTINUED NEXT PAGE

- (c) Labels D and E in Figure 1 represent the same process. Name this process and outline **two** reasons why it can occur. [3]

- (d) (i) Name the **two** slave systems of the original Baddeley and Hitch, 1974, Working Memory Model and state their functions. [4]

One: _____

Two: _____

- (ii) State the function of the Central Executive in the Baddeley and Hitch, 1974, Working Memory Model. [1]

8. [16 marks]

(2019:ATAR:7)

- (a) What does the term 'encoding' mean in relation to memory? [1]

Andreas is in Year 5 and is struggling with his least favourite subject – mathematics. Even though he learnt his multiplication tables in Year 3, he keeps confusing multiplication with his fraction work that he has learnt in class recently.

- (b) Name the type of forgetting Andreas is experiencing.

[1]

Keeley is an expert cellist. She has been performing since she was six and studied music theory from age 10 through to university, graduating with a masters degree in music (cello).

- (c) An unlabelled diagram below shows the divisions of long-term memory (LTM). Complete the table below by naming the types and subtypes of LTM referred to by A, B, C and D and describing how each contributes to Keeley's cello playing. [8]

Divisions of long-term memory

Type of LTM	Subtype of LTM	Application to Keeley
A		
B		
	C	
	D	

- (d) Name and describe briefly the three main ways in which memory researchers measure how much information people remember. [6]

One: _____
