

Self: Developmental Psychology

Chapter

6

1. [11 marks]

(2014:S3:5a-c)

(a) Name the stage of Piaget's theory of cognitive development that corresponds to each of the following characteristics. [4]

- (i) Conservation: _____
- (ii) Object permanence: _____
- (iii) Abstract thinking: _____
- (iv) Egocentrism: _____

(b) A psychologist has two glasses that are the same shape and size and are filled with equal amounts of water (see Figure 1). The psychologist pours the water from one glass into a tall thin glass (see Figure 2). The psychologist asks two children whether Glass one or Glass two has more water in it or whether both glasses have the same amount of water (see Figure 3).

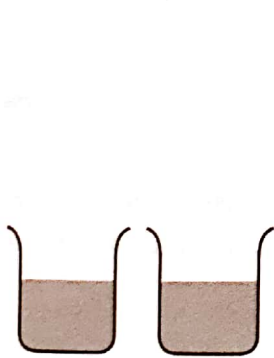

Figure 1.

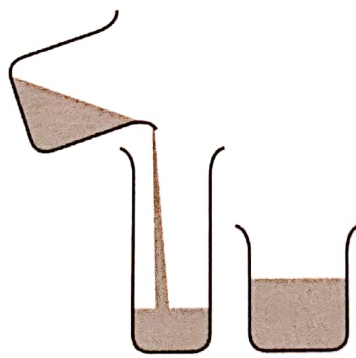

Figure 2.

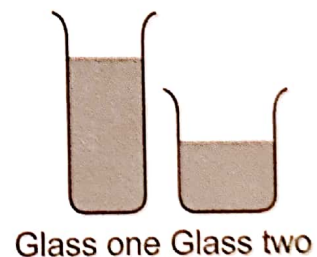

Figure 3.

Describe the response that each child would be most likely to give and explain the reason for the response.

(i) Nikolas (age 4) [2]

(ii) Hannah (age 10)

[2]

- (c) Dana is playing hide-and-seek with her brother Dion (aged three). Dion stands in the centre of the room and covers his eyes with his hands and says 'I am hiding'. Explain, why Dion believes that he is 'hiding', referring to the relevant concept from Piaget's theory of cognitive development. [3]

2. [8 marks]

(2015:S3:6a-c)

- (a) Identify which of the three levels of Kohlberg's theory of moral development is reflected in each of the following statements about whether it is acceptable to steal medicine if it will save a life.

- (i) Stealing is not acceptable as it violates the rule of honesty and respect. [1]

- (ii) Stealing is not acceptable as you will end up in prison or have to pay a big fine. [1]

- (iii) Stealing is not acceptable as it is breaking the law. [1]

- (b) Explain whether or not people who say it is acceptable to steal in some situations are less morally developed than people who say it is not acceptable to steal in some situations, according to Kohlberg's theory of moral development. [3]

- (c) Outline **two** similarities between Kohlberg's theory of moral development and Piaget's theory of cognitive development. [2]

One:

Two:

3. [6 marks]

(2017:ATAR:7)

For each scenario, **circle** which level of Kohlberg's theory of moral development the individual would be at and provide a reason for your response.

- (a) Myles works for a bakery. Although he knows it is illegal to take left-over bread at the end of the day, he takes it to give to a homeless man whom he has seen sitting in the park. [2]

Level: **Pre-conventional** **Conventional** **Post-conventional**

Reason:

- (b) Katie considered sneaking out of school early and going shopping. She decided to stay at school because she did not want to get caught and receive a detention. [2]

Level: **Pre-conventional** **Conventional** **Post-conventional**

Reason:

- (c) Lisa is sitting with her friend Monica when some other girls start making fun of a new student who is in a wheelchair. Monica's brother is in a wheelchair and she is sensitive about this, so Lisa decides against making fun of the new student. [2]

Level: **Pre-conventional** **Conventional** **Post-conventional**

Reason: _____

4. [15 marks]

(2018:ATAR:5)

- (a) There are many psychological theories about human development. Define 'developmental psychology'. [1]

- (b) List **two** features that distinguish a 'stage' theory of human development. [2]

One: _____

Two: _____

- (c) Identify the key theorist associated with 'moral development'. [1]

- (d) Identify the key features of moral reasoning for each developmental level as defined by the theorist in part (c). [3]

Level	Key features of moral reasoning
Preconventional	
Conventional	
Postconventional	

- (e) Name the theorist responsible for the stage theory of 'identity development'. [1]

The stage theory of identity referred to in part (e) involves a 'crisis' at each stage of development.

- (f) (i) Name and outline what 'crisis' occurs at Stage 5 of the theory. [2]

- (ii) Give **two** consequences for an individual who fails to resolve the crisis at Stage 5. [2]

One: _____

Two: _____

- (g) Martha is 45 years old. She has relationships with her family and friends. She feels a sense of accomplishment in her life, but is struggling with her identity. What can be inferred about the development of her identity formation on the basis of the stage theory of identity? [2]

- (h) State **one** criticism of the stage theory of identity. [1]

5. [16 marks]

(2019:ATAR:8)

(a) Which aspect of human development was the focus of Piaget's developmental theory? [1]

(b) (i) Define 'assimilation' according to Piaget's theory. [1]

(ii) Define 'accommodation' according to Piaget's theory. [1]

Piaget believed that humans progress through four stages of development.

(c) Complete the table below for Stages 2 and 4. [6]

Stage	Stage name	Age range	Characteristic/s
2			
4			

Erikson's theory of identity is a lifespan theory based on a series of psychosocial crises.

(d) Define the term 'psychosocial' as used by Erikson. [3]

Nefu is a 23-year-old. So far she has successfully resolved each psychosocial crisis as defined by Erikson.

- (e) (i) Name the stage and crisis Nefu has now reached. [2]

- (ii) Identify the **two** ways in which this crisis might be resolved. [2]

One: _____

Two: _____
