

Others: Social Psychology

1. [6 marks]

(2013:S3:6b)

- (a) Lin and Maya both smoke cigarettes for the first time. Lin believes that smoking cigarettes is 'fun'. Maya believes that smoking cigarettes is 'unhealthy'. Which person will experience the greater cognitive dissonance? Provide a brief reason for your answer. [2]

- (b) Explain, using cognitive dissonance theory, why a person who is paid \$5 to complete a very boring task might rate the task as more interesting than someone who is paid \$100. [4]

2. [6 marks]

- (a) Define and give an example of 'social facilitation'. [2]

Definition: _____

Example: _____

- (b) Define and give an example of 'social inhibition'. [2]

Definition: _____

Example: _____

- (c) High school students can be required to give oral presentations as a form of assessment. Teachers can use their understanding of social facilitation and social inhibition to maximise students' oral presentation performance. Describe **two** strategies a teacher might use for this purpose. [2]

One: _____

Two: _____

(2014:S3:7)

3. [7 marks]

- (a) Provide a psychological definition of 'attribution'. [2]

- (b) Sandie is waiting in a long line at the supermarket checkout to pay for a box of chocolates. Sandie is tapping her foot quickly and sighing loudly. An onlooker observes Sandie's behaviour and thinks that she is a quick-tempered person.

- (i) Explain, using attribution theory, why the onlooker is likely to think this. [2]

- (ii) Describe one alternative attribution for Sandie's behaviour. [1]

- (c) Explain, using attribution theory, the difference between the attributions people tend to make for the behaviour of others compared with their own behaviour. [2]

4. [11 marks]

(2015:S3:8)

- (a) Define 'cognitive dissonance'. [2]

- (b) Tim is a very health-conscious adolescent. He receives a new mobile phone for his birthday and is enjoying all the new functions. He then reads that mobile phones may be linked to cancer due to the radiation they emit. Tim experiences cognitive dissonance. Explain why. [2]

- (c) Outline **three** strategies that Tim might use to reduce the cognitive dissonance. [3]

One:

Two:

Three:

- (d) Jared's parents expect him to do very well at school. Jared gets a very good grade in Science but a very bad grade in French. Referring to attribution theory, give an example of how Jared might explain each grade to his parents. [4]

Science grade:

French grade:

5. [8 marks]

- (a) Provide **two** reasons why the study of attachment by psychologists is important. [2]

One: _____

Two: _____

- (b) (i) Name the most common type of attachment observed across cultures. [1]

- (ii) Outline **two** features of this type of attachment. [2]

One: _____

Two: _____

- (c) (i) Name **two** types of insecure attachment. [2]

One: _____

Two: _____

- (ii) Nadia is a two-year-old who became lost in a shopping centre. Outline how Nadia might have behaved when she was reunited with her mother if she had an insecure attachment. [1]

6. [14 marks]

- (a) Define 'social facilitation' and provide one example of this.

[2]

- (b) A museum hired new security guards to stop people from touching the displays. On training day the guards were told how to get people to obey their orders. Describe two factors that might have been discussed and refer to research by Milgram to support your response.

[6]

One: _____

Two: _____

- (c) Lola is shopping with three friends. Her friends suggest that they steal something. Describe **two** factors that might influence whether Lola conforms to the group and refer to research by Asch to support your response. [6]

One:

Two:

7. [10 marks]

(2017:ATAR:5)

Rose and Rupert are playing a popular new shooting game on their games console. Rose believes that playing violent games is acceptable because it is not real. Rupert believes that game developers should not make money from promoting violence.

- (a) (i) Identify the person who would experience the most cognitive dissonance and state the reason for your response. [2]

- (ii) After playing the game for two hours, Rupert rated the game as 9/10 for fun and Rose rated it as 6/10. According to cognitive dissonance theory, explain why Rupert would rate the game as more fun than Rose. [2]

- (b) Outline the 'fundamental attribution error' proposed by Heider. [2]

Moira arrived late for class on Monday. Moira usually arrives late at places.

- (c) (i) State **one** example of an attribution that people might make for Moira's lateness on the basis of Kelley's attribution theory. [1]

- (ii) Give a reason for your response to part (c)(i). [1]

- (iii) Several other students also arrived late for class on Monday. Referring to Kelley's theory, explain how this would affect the attribution that people might make for Moira's lateness. [2]

8. [10 marks]

(2018:ATAR:8)

- (a) Define the psychological term 'group polarisation' and provide a real-world example. [2]

- (b) Asch's line study found that a number of factors affected whether or not someone was likely to conform. Identify and describe **two** factors that affect the likelihood of conformity. [4]

One: _____

Two: _____

- (c) Define the psychological terms 'obedience' and 'conformity' and relate each term to Zimbardo's Stanford University experiment. [4]

9. [18 marks]

(2019:ATAR:6)

Jos is known by others as a risk-taker who enjoys dangerous sports; especially those involving high speeds, such as motor racing. He has had several minor accidents when driving on local roads. While driving close to home with his two closest friends (who are known to be very careful people), he is involved in a car accident in which no-one is hurt. His friends attribute the accident to his risk-taking behaviour.

- (a) Explain this attribution according to Heider's theory.

[2]

Kelley identified **three** covariant components that affect attribution.

- (b) Name and outline how each of these components can be applied to his friends' explanation for his accident. [6]

One:

Two:

Three:

- (c) Identify **one** key similarity and **one** key difference between Heider's and Kelley's attribution theories. [2]

Similarity:

Difference:

When the police investigate the accident, it is found that Jos was not the cause of the accident and was complying with all road rules. His friends struggle to accept that this is true.

- (d) Name and describe the key concept of the social psychology theory proposed by Leon Festinger. [2]

- (e) Apply Festinger's theory to explain why Jos's friends struggle to accept the findings of the police report. [2]

- (f) Refer to Festinger's theory to explain **two** ways in which Jos's friends could accept the report's findings. [4]
