

Week 1	Time taken	Rewards and self-care
Psychology Syllabus points Unit 3 to review this week: • structure and function of the nervous system ▪ central nervous system ▪ brain ▪ spinal cord ▪ peripheral nervous system ▪ somatic nervous system (afferent, efferent) ▪ autonomic nervous system – sympathetic, parasympathetic Tick once completed: Make flashcards / mindmap / mnemonic Quizzed on content Practice / make exam questions to time Self-asses answers with marking key		
Psychology Syllabus points Unit 4 for the week: Recap of developmental • features of Bandura’s Social Learning Theory ▪ the role of observational learning and modelling Personality • features and limitations of contemporary personality theories ▪ trait theories – McCrae and Costa ▪ humanistic theories – Rogers and Maslow ▪ social-cognitive theory – Mischel and Bandura		
Research Methods: • research terminology ▪ experimental, non-experimental ▪ scientific, non-scientific ▪ sample ▪ population • practical issues associated with planning and conducting research • difference between sample and population data Kristie Kendal book pages:		
Assessments due Investigation validation test		

Week 2	Time taken	Rewards and self-care
Psychology Syllabus points Unit 3 to review this week: • process of neural transmission ▪ role of synapses ▪ role of neurotransmitters – serotonin, dopamine • roles of the four lobes of the cerebral cortex ▪ frontal lobe – Broca's area, primary motor cortex ▪ parietal lobe – primary sensory cortex ▪ occipital lobe – primary visual cortex ▪ temporal lobe – Wernicke's area, primary auditory cortex Tick once completed: Make flashcards / mindmap / mnemonic Quizzed on content Practice / make exam questions to time Self-asses answers with marking key		
Psychology Syllabus points Unit 4 for the week: Social psychology • the influence of groups on behaviour ▪ group polarisation ▪ conformity and obedience – Asch, Milgram and Zimbardo		
Research Methods: • ethics in psychology research ▪ role of the experimenter ▪ participants' rights – privacy, anonymity, confidentiality, voluntary participation and withdrawal rights ▪ informed consent procedures ▪ deception in research ▪ professional conduct Kristie Kendal book pages:		
Assessment: Test – Research Methods, Developmental and Personality (5%)		

Week 3	Time taken	Rewards and self-care
Unit 3 Syllabus points to review this week: • factors that affect behaviour, emotion and thought, including: ▪ heredity – the role of genetics ▪ hormones – the effects of adrenaline and noradrenaline ▪ psychoactive drugs – the effects of depressants, stimulants and hallucinogens Tick once completed: Make flashcards / mindmap / mnemonic Quizzed on content Practice / make exam questions to time Self-asses answers with marking key		
Psychology Syllabus points Unit 4 for the week: • theories of social psychology ▪ attribution theory – Heider, Kelley ▪ cognitive dissonance theory – Festinger ▪ impact of the presence of others on individual behaviour – social facilitation and inhibition		
Research Methods: • features of experimental research methods ▪ independent and dependent variables ▪ operational hypotheses ▪ controlled and uncontrolled variables ▪ experimental and control groups		
Assessment: Project: Social Psychology (9%) handed out		

Week 4	Time taken	Rewards and self-care
Unit 3 to review this week: Cognition - psychological concepts and processes associated with memory and their relationship to behaviour - multi store model of memory – Atkinson and Shiffrin, 1968 - sensory register - duration, capacity, encoding - short-term memory (working memory) - duration, capacity and encoding - working memory model – Baddeley and Hitch, 1974 Tick once completed: Make flashcards / mindmap / mnemonic Quizzed on content Practice / make exam questions to time Self-asses answers with marking key		
Psychology Syllabus points Unit 4 for the week Culture and Value - sense of community as defined by McMillan and Chavis - membership - influence - integration and the fulfilment of needs - shared emotional connection		
Research Methods: - features of experimental research methods - placebo and experimenter effects - reliability and validity - longitudinal and cross-sectional designs		
Assessments: Project: Social Psychology (9%) due and validation		

Week 5	Time taken	Rewards and self-care
Unit 3 to review this week: ▪ long-term memory - o duration, capacity and encoding - o procedural memory - o declarative memory – semantic and episodic ▪ recall, recognition, re-learning ▪ forgetting: retrieval failure, interference, motivated forgetting, decay • theories and processes of learning ▪ classical conditioning ▪ operant conditioning ▪ observational learning Tick once completed: Make flashcards / mindmap / mnemonic Quizzed on content Practice / make exam questions to time Self-asses answers with marking key		
Psychology Syllabus points Unit 4 for the week • impact of significant events on individuals and communities ▪ positive responses – resilience and post traumatic growth ▪ negative responses – post traumatic stress disorder ▪ event characteristics contributing to stress – predictability; controllability; experience of threat or loss		
Research Methods: • features of non-experimental (descriptive) research methods ▪ case studies, surveys, correlational studies and archival research ▪ behavioural variables (not dependent and independent variables) in correlational studies		
Assessment:		

Week 6	Time taken	Rewards and self-care
Unit 3 to review this week: Cognition and Relational Influences - techniques for modifying behaviour: token economies, systematic desensitisation, cognitive behaviour therapy (CBT) - positive and negative reinforcement, including rewards and punishment - types of solutions to resolve conflict: imposed, distributive and integrative - techniques for resolving conflict: mediation, negotiation, counselling - socialisation processes observed within families - attachment – Harlow, Bowlby, Ainsworth - features of different parenting styles – authoritative, authoritarian and permissive Tick once completed: Make flashcards / mindmap / mnemonic Quizzed on content Practice / make exam questions to time Self-assess answers with marking key		
Psychology Syllabus points Unit 4 for the week - impact of significant events on individuals and communities - positive responses – resilience and post traumatic growth - negative responses – post traumatic stress disorder - event characteristics contributing to stress – predictability; controllability; experience of threat or loss		
Research Methods: Processing and evaluating psychological research - methods of displaying quantitative data – tables, graphs and diagrams - data interpretation - measures of central tendency – mode, mean and median - measures of dispersion – normal curve, range, variance and standard deviation - role of probability		
Assessments: Test: Research Methods, Culture and values (5%)		

Week 7	Time taken	Rewards and self-care
Unit 3 to review this week: Communication communication styles ▪ impact of social background – Bernstein, Labov ▪ examples of gender differences – Tannen • features of persuasive communication ▪ source of the message ▪ nature of the communication ▪ characteristics of the audience • features and limitations of theories of language development ▪ innate and learned behaviours – Chomsky, Bruner Tick once completed: Make flashcards / mindmap / mnemonic Quizzed on content Practice / make exam questions to time Self-asses answers with marking key		
Psychology Syllabus points Unit 4 for the week		
Research Methods: • use of correlation to establish association between variables • sources of error in data and ways of reducing these		

Week 8	Time taken	Rewards and self-care
Unit 3 to review this week: Tick once completed: Make flashcards / mindmap / mnemonic Quizzed on content Practice / make exam questions to time Self-asses answers with marking key		
Psychology Syllabus points Unit 4 for the week		
Research Methods: - the concept of statistical significance - evaluation of and ways of improving research		
Assessment: Extended response: Social Psychology and Culture and Values or Developmental Psychology or Personality (5%)		

Week 9	Time taken	Rewards and self-care
Unit 3 to review this week: Tick once completed: Make flashcards / mindmap / mnemonic Quizzed on content Practice / make exam questions to time Self-asses answers with marking key		
Psychology Syllabus points Unit 4 for the week		
Research Methods:		

Week 10	Time taken	Rewards and self-care
Unit 3 to review this week: Tick once completed: Make flashcards / mindmap / mnemonic Quizzed on content Practice / make exam questions to time Self-asses answers with marking key		
Psychology Syllabus points Unit 4 for the week		
Research Methods:
