SHORT ANSWER

The next question refers to the diagram below.

1. a. What event does E represent? (1 mark) ovulation
- b. What is structure B called? (1 marks) corpus luteum.

2. Give two differences between sperm production (^{spermato}ogenesis) and ova production (oogenesis) (2 marks)

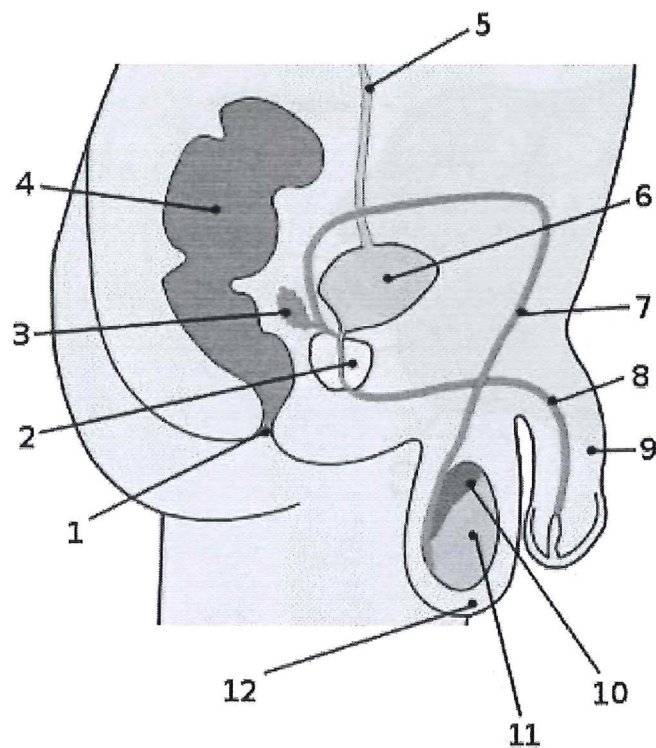

any 2:

1 ova vs 4 sperm

spermatogenesis continuous, oogenesis not

oogenesis = polar bodies, sperm not.

3. The diagram below illustrates the male reproductive system.

Name the following structures. (6 marks)

- 1 anus
- 3 seminal vesicle
- 7 vas deferens
- 8 urethra
- 10 epididymis
- 11 testes

4. Describe what happens during the menstrual cycle in the uterus and ovary. Include the changes which are occurring, and the names of the hormones which are causing those changes.

a. Uterus (5 marks)

Before ovulation:

- period - shed uterine lining (menstrual phase) ①
- build up lining (proliferative phase) ①
 - ↳ due to oestrogen ①

After ovulation:

- secretory phase ① - lining maintained
 - ↳ by progesterone ①

b. Ovary (5 marks) - any 5 of 6.

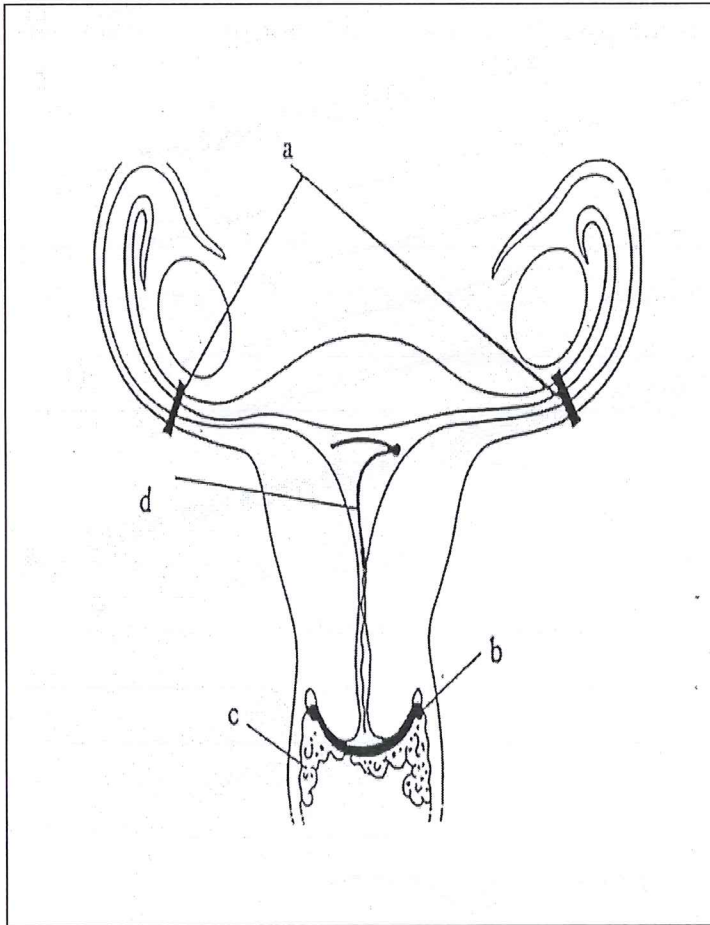

Before ovulation:

- ① 'follicular phase' ①
- Ovum develops within follicle
 - ↳ due to FSH ①

After ovulation:

- follicle turns into corpus luteum ①
- releases progesterone ①
- luteal phase ①

6. Referring to the following diagram to answer the questions below.

Name each method of contraception indicated by the letters and **explain** how they work. (4 marks)

A Tubal ligation
egg can't travel through fallopian tubes

D IUD
hormones released to prevent ovulation and implantation
OR copper to interfere w/ sperm.

7. Give **three reasons** why a female might choose to use condoms instead of the contraceptive pill. (3 marks)

(accept others)

1 reduce STI risk

2 negative effects of hormonal contraceptives

3 forget to take pill every day

8. Describe **three ways** in which a hormonal contraceptive prevents pregnancy in the female. (3 marks)

1 stops egg development / ovulation

2 thickens cervical mucus so not let sperm through.

3 less oestrogen so lining doesn't build up / interface w/ lining so not hospitable for implantation.
