

Using tables to solve linear functions

Which fish is the most ferocious?

Construct a table of values for each of the linear function rules. Use the number in the bolded box and the letter in the question box to fill in the code box below to solve the riddle.

Function: $f(x) = 4x$

A

x	-3	-2	-1	0	1	2	3
$f(x)$							

Function: $f(x) = -3x$

E

x	-3	-2	-1	0	1	2	3
$f(x)$							

Function: $f(x) = 6x + 3$

T

x	-3	-2	-1	0	1	2	3
$f(x)$							

Function: $f(x) = -7x + 5$

I

x	-3	-2	-1	0	1	2	3
$f(x)$							

Function: $f(x) = 2x - 5$

N

x	-3	-2	-1	0	1	2	3
$f(x)$							

Function: $f(x) = -x - 7$

R

x	-3	-2	-1	0	1	2	3
$f(x)$							

Function: $f(x) = \frac{8x-4}{2}$

P

x	-3	-2	-1	0	1	2	3
$f(x)$							

Function: $f(x) = \frac{-5x-5}{10}$

H

x	-3	-2	-1	0	1	2	3
$f(x)$							

21	-1.5	-9

10	5	-10	8	-1	-1.5	8

Graphing linear functions

What element is fused into helium to make the Sun shine?

Graph each of the following functions on the same set of axes. The line will go through a letter and a number that you can use in the code box below to solve the riddle.

$$f(x) = 2x - 5$$

$$f(x) = 3x - 10$$

$$f(x) = 4x + 2$$

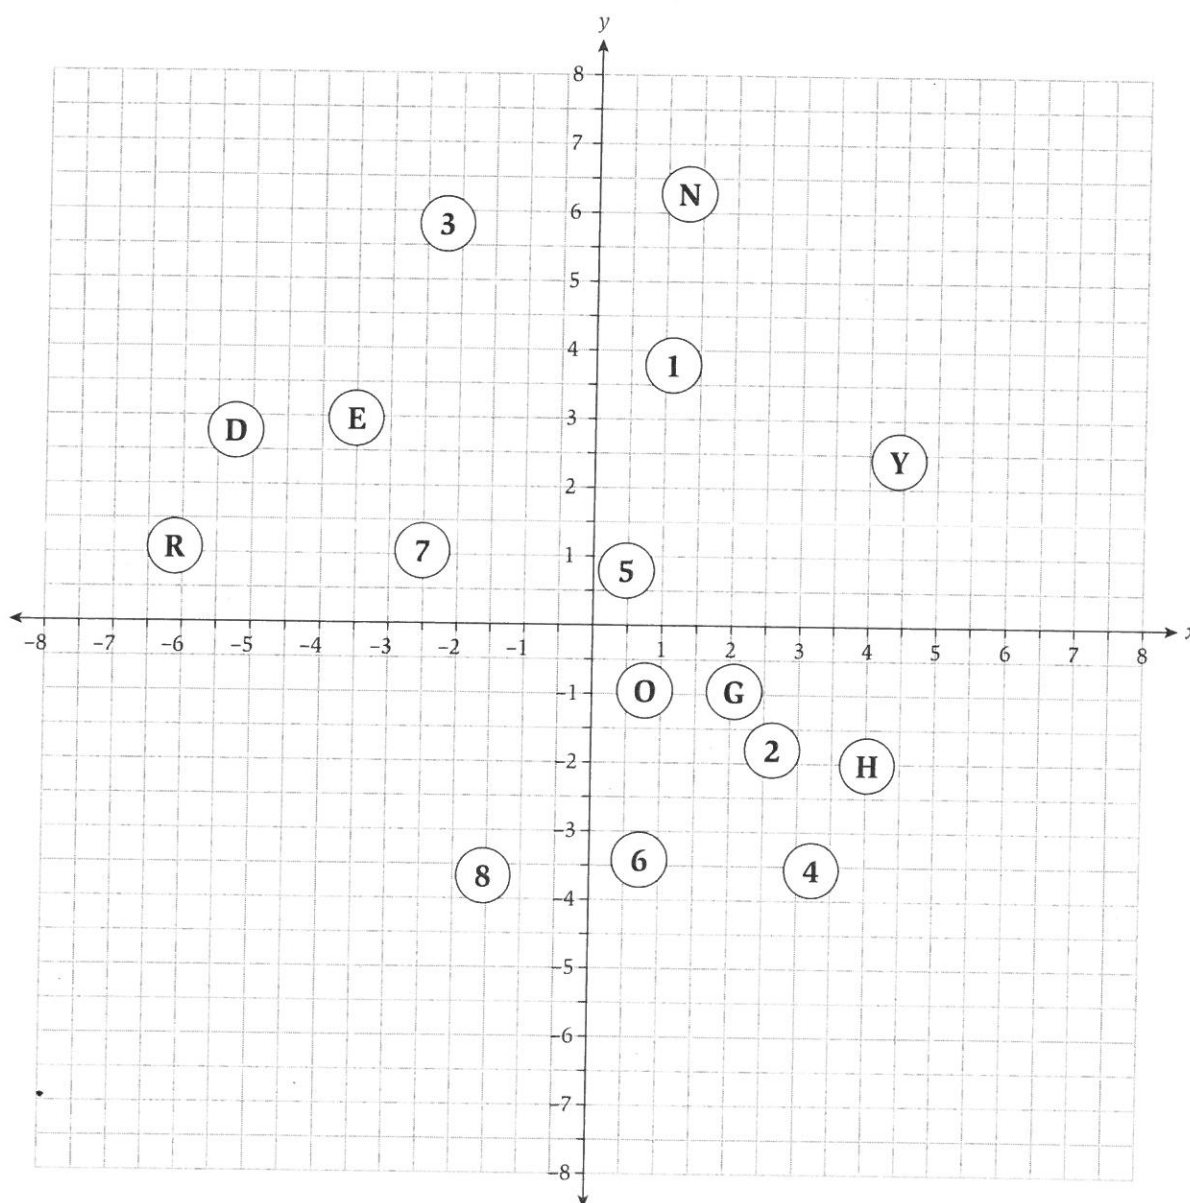

$$f(x) = x + 8$$

$$f(x) = -2x + 6$$

$$f(x) = -5x + 3$$

$$f(x) = -2x - 4$$

$$f(x) = -0.5x - 2$$

1	2	3	4	5	6	7	8
