

Area of Parallelograms and Rhombuses

© FREEFALL MATHEMATICS - FREEFALL MATHEMATICS ALTITUDE BOOK 2 - LICENSED FOR NON-COMMERCIAL USE

Find the area of these parallelograms.
Round to 1 d.p. if needed.

Example

$$A = bh$$

$$= 17 \times 8$$

$$A = 136 \text{ cm}^2$$

1

$$A = bh$$

$$= \square \times \square$$

$$A = \square \text{ cm}^2$$

2

3

4

Find the area in cm^2 .

5

6

7

8

A rhombus is like a square that has been pushed over. Find the area, 1 d.p. when needed.

Example

$$A = \frac{1}{2}xy$$

$$\text{Calc: } 0.5 \times 22 \times 47 =$$

$$= \frac{1}{2} \times 47 \times 22$$

$$A = 517 \text{ mm}^2$$

9

10

$$A = \frac{1}{2}xy$$

$$= \frac{1}{2} \times \square \times \square$$

$$A = \square \text{ cm}^2$$

11

12

All units are in cm.
