**I think of a number, double it  
and my answer is 15.**

$$2x = 15$$

$$x = 7.5$$

# matching activity

match the cards  
into groups of 3...

I think of a number, double it  
and my answer is 15.

$$2x = 15$$

$$x = 7.5$$

|                                                                      |                        |           |
|----------------------------------------------------------------------|------------------------|-----------|
| I think of a number, double it and my answer is 15.                  | $2x + 1 = 15$          | $x = 8$   |
| I think of a number, double it and then add on 7. My answer is 8.    | $2x - 1 = 15$          | $x = 14$  |
| I think of a number, halve it and my answer is 15.                   | $\frac{x + 2}{2} = 8$  | $x = -7$  |
| I think of a number, double it and then add on 1. My answer is 15.   | $2(x + 7) = 8$         | $x = 13$  |
| I think of a number, halve it and then take away 2. My answer is 8.  | $\frac{x}{2} + 2 = 15$ | $x = 6.5$ |
| I think of a number, add on 2, halve it and my answer is 8.          | $\frac{x}{2} = 15$     | $x = 0.5$ |
| I think of a number, add on 2 and my answer is 15.                   | $x - 7 = 15$           | $x = 7$   |
| I think of a number, double it and then subtract 1. My answer is 15. | $2x + 7 = 8$           | $x = 7.5$ |

|                                                                        |                       |          |
|------------------------------------------------------------------------|-----------------------|----------|
| I think of a number, add on 15<br>and my answer is 8.                  | $\frac{x}{2} - 2 = 8$ | $x = 20$ |
| I think of a number, take away 7<br>and my answer is 15.               | $x + 2 = 15$          | $x = 30$ |
| I think of a number, take away 2<br>and then halve it. My answer is 8. | $x - 2 = 15$          | $x = 3$  |
| I think of a number, add on 7 and then<br>double it. My answer is 8.   | $2x = 15$             | $x = 26$ |
| I think of a number, subtract 2<br>and my answer is 15.                | $\frac{x - 2}{2} = 8$ | $x = 17$ |
| I think of a number, add on 1 and then<br>double it. My answer is 15   | $2x + 2 = 8$          | $x = 22$ |
| I think of a number, halve it, add on 2<br>and my answer is 15.        | $x + 15 = 8$          | $x = -3$ |
| I think of a number, double it and then<br>add on 2. My answer is 8.   | $2(x + 1) = 15$       | $x = 18$ |
