

You will need to select an area of gene technology to research and present your information on a poster using text and graphics. Part of the task involved identifying positives and negatives related to this type of technology.

They explain the processes that underpin heredity and evolution.

Key words: Genes, DNA, Genetic manipulation, Genetic engineering

	Excellent achievement (5)	High achievement (4)	Satisfactory achievement (3)	Limited achievement (2)	Very low achievement (0-1)
Communication	Provides clear and detailed explanations of complex scientific theories, systems and concepts, using correct scientific terminology	Provides clear and correct explanations of scientific theories, systems and concepts, using scientific terminology in the correct context.	Explains scientific concepts in brief, simple terms, using correct scientific terminology.	Outline scientific concepts in simple terms, sometimes using some scientific terminology.	Uses everyday language to explain some scientific concepts.
	Uses correctly labelled and detailed diagrams and other representations to enhance explanations of complex scientific models.	Draws labelled diagrams and other representations to illustrate scientific models in support of explanations.	Draws partly labelled diagrams and other representations to illustrate scientific models and makes some simple references to them in explanations.	Includes sketchy diagrams and other representations to illustrate scientific models but does not refer to the diagrams in explanations.	Does not include diagrams or representations, or they lack key information.
Science as a Human Endeavour	Presents a range of evidence that led to the development of a theory, and clearly explains how the evidence supports the theory.	Presents a range of evidence that led to the development of a theory and describes aspects of how it supports the theory.	Presents a range of evidence that led to the development of a theory	Presents some simple evidence that led to the development of a theory.	States that scientists do research to find evidence.

Achievement standard : COMMUNICATING

Communicate scientific ideas and information for a particular purpose, including constructing evidence-based arguments and using appropriate scientific language, conventions and representations ([AC SIS208](#))
