

YEAR 10 SCIENCE (ADJUSTED)
RESEARCH ASSIGNMENT - AUSTRALIAN BUSHFIRES

NAME: _____

MARK: $\frac{\quad}{27}$

Using the Stile lesson The Australian Bushfires, answer the following questions. You will need to work through each part carefully and write down the information.

1. How big is the area burned in Australia compared to the recent fires in The Amazon?
(1 mark)

2. What were two conditions that contributed to the disastrous fire conditions?
(2 marks)
 -
 -

3. What is the "fire triangle"? Put a picture of it here and explain what it shows.
(2 marks)

4. Name two major causes of the recent fires in Australia.
i.e. How were they started?
(2 marks)
 -
 -

5. (a) What is meant by the term "climate change"?
(1 mark)

(b) CO₂ is a major greenhouse gas. Which activity of humans is **most responsible** for producing lots of CO₂? (1 mark)

(c) List three effects of climate change. (2 marks)

-
-
-

6. Write true (T) or false (F) for each of the following statements about bushfires and climate change. **Look for a fact sheet to help you with these questions.** (6 marks)

- Bushfire risk is rising. _____
- Climate change is not influencing bushfires. _____
- Fuel is always the main factor in fire risk. _____
- Recent hot weather (last 5 years) is within normal range. _____
- Australia's climate is changing. _____
- The costs of bushfires and other weather-related disasters is increasing. _____

7. (a) What was the date of the highest average temperature in Australia? (1 mark)

(b) What was the average temperature in Australia on this date? (1 mark)

(c) How much has Australia warmed since 1950? (1 mark)

8. How does climate change make bushfires worse? (3 marks)

-
-
-

9. Suggest three ways in you, as an individual, can help fight climate change.

(3 marks)

-
-
-
