

TIMELINE OF THE DEVELOPMENT OF THE BIG BANG THEORY

This timeline gives some of the major scientists and activities in the development of the Big Bang Theory, but it is not exhaustive. There are others who have contributed.

Use this as the basis for your research.

1915 Albert Einstein $E = mc^2$ and his field equations from general relativity.

1927 Lemaitre proposes Big Bang Theory.

1929 Edwin Hubble investigates distant galaxies and their movement - red-shift of light.

1933 Lemaitre publishes theory.

1948 Fred Hoyle proposes Steady State Theory.
Gamow + Alpher propose their version of Big Bang Theory.

1965 Penzias + Wilson find the cosmic background radiation.
Hoyle admits defeat.

1997 Brian Schmidt and team find the expansion of the universe is accelerating. Dark energy / matter involved.
