

NAME:

Practical Assessment

MARK:

10

Equipment: trundle wheel, 50 m tape

Scale?

Distances

1. Doors into Victoria Square to the oval gates.

Distance = 127 ✓

2. Door to Huasahuasi 6 to sliding doors Lyon1.

Distance = 248 ✗

Scale Determination

- Use the trundle wheel or 50 m tape to measure the length of Victoria Square building along the boulevard side.

Write this onto your map.

- Measure the length of the building on the map accurately with a ruler.

Write this as a scale on the bottom of the map.

e.g. 2.5 cm = 40 m

Displacement

Now use the scale to work out the displacement for each journey.

You will need to draw cross-hairs with compass directions onto the diagram. Don't forget to put a rough direction as a bearing.

1. Doors into Victoria Square to the oval gates.

Displacement = 95 ✓

Bearing: 210° ✓

2. Door to Huasahuasi 6 to sliding doors Lyon1.

Displacement = 189.6 ✓

Bearing: 135° ✓
