

MARK: 10

Equipment: trundle wheel, 50 m tape.

Distances

1. Doors into Victoria Square to the oval gates.

Distance = 145.8m

2. Door to Huasahuasi 6 to sliding doors Lyon1.

Distance = 233.5m

Scale Determination

- Use the trundle wheel or 50 m tape to measure the length of Victoria Square building along the boulevard side.

Write this onto your map.

- Measure the length of the building on the map accurately with a ruler.

Write this as a scale on the bottom of the map.

e.g. 2.5 cm = 40 m

Displacement

Now use the scale to work out the displacement for each journey.

You will need to draw cross-hairs with compass directions onto the diagram. Don't forget to put a rough direction as a bearing.

1. Doors into Victoria Square to the oval gates.

Displacement = 104.75 Bearing: 198°

2. Door to Huasahuasi 6 to sliding doors Lyon1.

Displacement = 205.69 Bearing: 130°
