

YEAR 10 SCIENCE (ADJUSTED) **PHYSICAL SCIENCES** **REVISION - TEST 1**

1. A person wants to go from Bunnings Belmont to Kmart Belmont. Use the scale on the map to work out:
 - (a) the distance between the two stores.
 - (b) the displacement of the person. Remember - this is in a straight line and you need to estimate the bearing (angle).

2. Complete the following table. Make sure you include the appropriate units for each quantity.

Distance travelled	Time taken	Average speed
100 m	20 s	
3000 m		15 m/s
	15 s	20 m/s
2000 m		25 m/s

3. What is the speed of a sprinter who runs 100 m in 12.5 seconds?
4. What distance does a plane cover in 3.5 hours if it is flying at 550 kmh?
5. How long will it take a horse moving at 14 m/s to do one lap of an 840 m track?
