Measuring speed

2. The time between each of the dots on the following ticker tape is 0.02 s.

- (a) Calculate the average speed of the object to which the tape was attached for each time interval. Express your answers in mm/s.

Interval	Distance between dots (mm)	Average speed (mm/s)
AB		
BC		
CD		
DE		
EF		
FG		

- (b) Describe the motion of the object to which this tape was attached.
