

Name: _____

Class: _____

ACTIVITY SHEET

1.1 Crossword puzzle

Use the clues to complete the crossword. Some clues have two-word answers, but do not insert a space between the two words of your answer.

Across

- 1 Substance made of atoms with same number of protons
- 5 Number of protons and neutrons in the nucleus of an atom
- 7 Region around nucleus containing electrons with equal energy
- 9 Number of protons in the nucleus of an atom
- 10 Atoms of an element with varying numbers of neutrons
- 11 Region around nucleus where electrons are likely to be found
- 16 Arrangement of electrons around nucleus in energy levels
- 17 Different wavelengths of light emitted by an excited atom
- 18 Negatively charged sub-atomic particles found outside the nucleus
- 19 Positively charged sub-atomic particles found in the nucleus
- 20 Emitted when unstable nuclei spontaneously disintegrate

Down

- 2** Dense central region of an atom
- 3** Type of force that binds neutrons and protons together in the nucleus
- 4** Uncharged sub-atomic particles found in the nucleus
- 6** Different physical forms of the same element
- 8** Type of attraction between oppositely charged objects
- 12** Property of sub-atomic particles that may be positive or negative
- 13** Name of table with elements arranged by increasing atomic number
- 14** Each element has a unique one
- 15** Particles of which all matter is made
