ACTIVITY SHEET

2.3 Solar stills

Solar stills are sometimes provided in lifeboats and life rafts as they can produce drinkable water from seawater. The photograph below shows a commercially available solar still.

- 1 Use the Internet to find out how a solar still works.
- 2 Complete a two-dimensional, labelled diagram of the structure of a typical solar still, then explain using arrows and your own words how it works.

Alamy/Marcus Harrison – outdoors

Diagram:	Explanation:

- 3 Identify the type of weather on the ocean in which a solar still would work best.
