

Name: _____

Class: _____

ACTIVITY SHEET

3.1 Crossword puzzle

Use the clues to complete the crossword.

Across

- 6 Type of bond involving attraction between cations and anions in a compound
- 7 Charged atom or group of atoms
- 8 Type of substance that exists as a three-dimensional network of covalently bonded atoms
- 12 Type of paired electrons shared by two atoms to form a covalent bond
- 13 Type of detached electrons that are free to move about within the structure
- 17 Type of covalent bond in which two pairs of electrons are shared
- 18 Type of substance consisting of discrete molecule in which atoms are joined by covalent bonding
- 19 Type of electrons found in the outer shell of an atom in its ground state
- 22 Type of dot formula used to represent valence electrons of atoms or ions
- 23 Type of formula showing the simplest whole number ratio of atoms of different elements in a chemical compound

24 The number of single bonds with hydrogen atoms that the atom could form

25 Type of covalent bond with more than one pair of shared electrons

Down

1 Negatively charged atom or group of atoms

2 Pair of valence electrons that are not involved in the covalent bond

3 Type of bond involving electrostatic forces of attraction that holds atoms together within a molecule

4 Type of bond involving electrostatic forces of attraction between molecules in close proximity

5 Type of compound made up of positive ions and negative ions

9 Type of bonding that occurs in most directions

10 Pure substance composed of more than one type of atom bonded together

11 Type of attraction between shared electrons and the nuclei of the atoms involved

14 Type of direct line bonding between adjacent atoms in a molecule

15 Type of bonding involving attraction between delocalised valence electrons and metal cations

16 Type of ion that consists of two or more atoms that are strongly covalently bonded

20 Type of bond formed by attraction between protons and electrons of participating atoms

21 Positively charged atom or group of atoms
