I'm trying the attached method for getting students to learn ions -- breaking up the task and grouping them by pattern. Will give little quizzes at the start of each new week and Test 1 will include naming & writing formula using ions from the Week 1 and Week 2 lists.

I am seeing them for the first time today but after going through introductions and course outline I will hand this out. I'll also review how to write formulae and get them to do Set 13 from Exploring Chemistry Stage 2 (looking up ions and formulae as needed).

Depending on how things go today, next lesson will probably start Chapter 5 of Exploring Chem.

I put ions and moles at the start as this section requires a lot of work and I am hoping that some students will realise quickly that it's not for them and will change course (as opposed to realising that in 6 months time after they failed the exam).

Hi McKenna

Thank you so much for your reply and as soon as you finish writing resources please send to me by email. Also I am very happy to hear that you can help me to make judgments about student grades. My HOLA is Richard Miles, he will be very happy for your help.

Kind Regards

Jijy D'cruz

Hi Jijy.

I'm the chem teacher at Bunbury SHS. Happy to help with resources, although most of them I'll need to email them after I write them (not quite that prepared unfortunately).

I'm also happy to help with judgements about student grades but to my knowledge you don't need to do actual moderation processes for Year 11 courses.

HOLA is Trevor Walkington (albert.walkington@education.wa.edu.au)

Hi Hayden

Thought I would send this to you ☺

Cheers
Cathy

Hi Cathy

I am Jijy D'cruz from Safety Bay Senior High School. I would like to know who is doing ATAR Year-11 Chemistry this year in your school. I am using the programme of Bunbury Senior High School which I have got from Connect site. I would like the person who is doing this course to act as a moderating partner for me and to share some resources with me. I haven't taught Chemistry last year.

Could you please give my email address to that person and please ask him to contact me through email. Much appreciated. Also could you please give me Science - head of department email address for my manager to contact him.

Thanks a lot

Jijy D'cruz
