Question Sheet: Energy

0:17 ?Beware! this is an Old video clip, you will see why in a moment.. it still has some good information...

0:25 Which energy transformation does this radio perform?

☐

Sound energy -> Chemical energy

☐

Sound energy -> Electrical energy

☐

Electrical energy -> Sound energy

☐

Electrical energy -> Nuclear energy

1:10 What is the definition of energy?

2:13 The stored energy in the jack in the box is in the

☐

lid

☐

lock/catch on the box

☐

spring

☐

clown

3:31 The last clip showed a variety of energy transfers, which of the Following was NOT shown

- ☐ wind energy to electrical energy
- ☐ electrical energy to wind energy
- ☐ solar energy to heat
- ☐ solar energy to kinetic (movement) energy

5:33 Which of the following show the different energy transfers to get the water up to the beaker in the last few clips.

- ☐ bunsen burner, hand pump, electric pump
- ☐ temperature, muscles, electricity
- ☐ heat, chemical, electrical
- ☐ heat, wind, electrical

6:56 Energy is measured in _____.

7:34 Potential energy is stored energy that is related to

- ☐ height of an object
- ☐ speed of an object

8:03 The potential energy of the coconuts was transfered into kinetic (movement) energy

- ☐ True
- ☐ False

13:30 The energy of eating two standard shredded wheat biscuits is

☐

45g

☐

665kj

☐

1475kj

☐

100gm

14:39 Energy from the food we eat gets transfers mostly into our muscles as chemical energy, and only a small amount is released as heat.

☐

True

☐

False

15:04 The energy from the fuel, in the drag race car, is transfered into:

☐

heat

☐

kinetic (movement)

☐

sound and light

☐

all of the above

15:33 Energy __ must equal energy _____. This is called the Law of Conservation of Energy..

16:04 What do you guess the car will go up to

☐

40

☐

35

☐

30

☐

25

16:16 The car slows down because the energy is transferred into

☐ movement and sound

☐ heat and sound

☐ friction, heat and sound

☐ sound only

16:38 The electrical energy gets transferred into:

☐ mostly heat and some light

☐ mostly light and some heat

17:14 Which light bulb is most efficient?

☐ Incandescent (older style)

☐ Compact Fluorescent (newer style)

18:26 Power stations are normally very efficient and don't have a lot of wasted heat energy.

☐ True

☐ False
