

Holy Cross College
Year 9 Science
Research Assignment - Dark Side of Radiation

Due date: _____

Task Description

You will produce a report on the Dark Side of Radiation. You must use your ***Jacaranda book and the Internet*** to gather information on the following.

1. What are the types of radiation? Include diagrams to help explain their characteristics.
2. What are the uses of radiation? Include some information about associated dangers with these uses.
3.
 - (a) What happened at Chernobyl in 1986?
 - (b) What caused the disaster at Fukushima in 2011?
 - (c) How did these nuclear disasters affect the environment?
4. Define the following terms:
 - (a) melt-down.
 - (b) thermal flash.
 - (c) electromagnetic pulse.
 - (d) ground zero.
 - (e) nuclear fall-out.
5. How do nuclear weapons work? Give examples of when they have been used.

You will need to use pictures and diagrams to help explain your findings and write in an appropriate style for a Middle School student to be able to understand.
